

Strategas Macro Thematic Opportunities ETF (SAMT)
Strategas Global Policy Opportunities ETF (SAGP)
each a series of The Advisors' Inner Circle Fund III (the "Trust")

Supplement dated October 12, 2023
to the Summary Prospectus, Prospectus, and Statement of Additional Information ("SAI")
(each a "Fund" and collectively the "Funds"),
each dated May 1, 2023

At a special meeting held on September 26, 2023, shareholders, of each fund separately, approved a new investment sub-advisory agreement between Vident Advisory, LLC, Strategas Asset Management, LLC, and acknowledged and accepted by The Advisors' Inner Circle Fund III.

Any references in the Summary Prospectus, Prospectus and SAI to Vident Investment Advisory, LLC as the sub-adviser for either Fund is deleted and replaced with Vident Advisory, LLC.

In the section in the SAI titled "The Adviser And Sub-Adviser," under the heading titled "Sub-Adviser - General," this paragraph "Vident Investment Advisory, LLC, a Delaware limited liability company formed and registered with the SEC in 2014, serves as the sub-adviser to the Funds. The Sub-Adviser's principal place of business is located at 1125 Sanctuary Pkwy., Suite 515, Alpharetta, Georgia 30009. The Sub-Adviser is a wholly-owned subsidiary of Vident Financial, LLC. Vident Financial, LLC is a wholly-owned subsidiary of Vident Investors' Oversight Trust. Vince L. Birley, Mohammad I. Baki, and W. Baker Crow serve as the trustees of Vident Investors' Oversight Trust. As of March 31, 2023, the Sub-Adviser had approximately \$7.1 billion in assets under management." is replaced with the following:

Vident Advisory, LLC, a Delaware limited liability company formed and registered with the SEC in 2019, serves as the sub-adviser to the Funds. The Sub-Adviser's principal place of business is located at 1125 Sanctuary Pkwy., Suite 515, Alpharetta, Georgia 30009. The Sub-Adviser is owned by Vident Capital Holdings, LLC, which is controlled by MM VAM, LLC. MM VAM, LLC, an entity owned by Casey Crawford, is located at 8024 Calvin Hall Road, Indian Land, South Carolina 29707. As of July 31, 2023 the Sub-Adviser had approximately \$7.4 billion in assets under management.

Strategas Macro Thematic Opportunities ETF (SAMT)
Strategas Global Policy Opportunities ETF (SAGP)
(each a “Fund” and collectively the “Funds”)
each a series of The Advisors’ Inner Circle Fund III (the “Trust”)

Supplement dated June 30, 2023
to the Summary Prospectuses, Prospectus, and Statement of Additional Information (“SAI”),
each dated May 1, 2023

Notice of Potential Ownership Change

Vident Investment Advisory, LLC (“VIA”) serves as the current sub-adviser to each Fund pursuant to a sub-advisory agreement between VIA and Strategas Asset Management, LLC (“SAM”), the Funds’ adviser (the “Current Sub-Advisory Agreement”).

Pursuant to a membership interest purchase agreement signed on March 24, 2023, Vident Capital Holdings, LLC, a subsidiary of MM VAM, LLC, is expected to acquire Vident Advisory, LLC (the “Transaction”). MM VAM, LLC is an entity controlled by Casey Crawford. As of the closing date, Mr. Crawford will effectively control Vident Advisory (“VA”) which will acquire the assets and liabilities of VIA. The Transaction is expected to be completed in the third quarter of 2023. Upon the close of the Transaction, pursuant to the Investment Company Act of 1940, as amended (the “1940 Act”), the Current Sub-Advisory Agreement will automatically terminate.

In anticipation of the termination of the Current Sub-Advisory Agreement, VA is seeking to enter into a new investment sub-advisory agreement with SAM (the “New Sub-Advisory Agreement”). The New Sub-Advisory Agreement is subject to approval by a Fund’s shareholders.

At a meeting of the Board of Trustees of the Trust (the “Board”), held on June 22, 2023, the Board, including a majority of the trustees who are not interested persons of the Trust (as defined by the 1940 Act), approved (i) the New Investment Sub-Advisory Agreement between SAM and VA; and (ii) an interim sub-advisory agreement between SAM and VA (the “Interim Sub-Advisory Agreement”). The Interim Sub-Advisory Agreement will take effect upon the closing of the Transaction and will replace the Current Sub-Advisory Agreement, if the New Sub-Advisory Agreement has not yet been approved by a Fund’s shareholders and become effective. Pursuant to the Interim Sub-Advisory Agreement, VA may provide investment sub-advisory services to each Fund for up to 150 days between the effective date of the Interim Sub-Advisory Agreement and shareholder approval of the New Sub-Advisory Agreement.

There will be no change in either Fund’s portfolio managers, investment objective, principal investment strategy, and investment policies in connection with the Transaction.

Under the New Sub-Advisory Agreement, VA will receive the same compensation VIA currently receives under the Current Sub-Advisory Agreement. The Board approved the submission of the proposal to each Fund’s shareholders. A special meeting of shareholders will be held to consider and vote on the proposal. Proxy materials will be sent to shareholders with more information about the shareholder meeting and the proposal (the “Proxy Statement”).

Please read the Proxy Statement when it is available because it contains important information. You can obtain free copies of the Funds’ Proxy Statement (when available), Prospectus and SAI, as well as the Funds’ Annual Report, by calling 1.855.457.3637 or by visiting www.strategasetfs.com. The Proxy Statement will be available for free on the SEC’s website (www.sec.gov).

The foregoing is not an offer to sell, nor a solicitation of an offer to buy, shares of the Fund, nor is it a solicitation of any proxy.

Please retain this Supplement for future reference.

Before you invest, you may want to review the Fund's complete prospectus, which contains more information about the Fund and its risks. You can find the Fund's prospectus and other information about the Fund online at <https://strategasetfs.com/sagp>. You can also get this information at no cost by calling 855-457-3637, by sending an e-mail request to strategasetfs@seic.com, or by asking any financial intermediary that offers shares of the Fund. The Fund's prospectus and statement of additional information, both dated May 1, 2023, as they may be amended from time to time, are incorporated by reference into this summary prospectus and may be obtained, free of charge, at the website, phone number or e-mail address noted above.

Investment Objective

The Strategas Global Policy Opportunities ETF (the “Global Policy Opportunities ETF” or the “Fund”) seeks long-term capital appreciation.

Fund Fees and Expenses

This table describes the fees and expenses that you may pay if you buy, hold and sell shares of the Fund. You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the table and Example below.

Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)

Management Fee	0.65%
Other Expenses	0.00%
Total Annual Fund Operating Expenses	0.65%

Example

This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other funds.

The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the Fund’s operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

1 Year	3 Years	5 Years	10 Years
\$66	\$208	\$362	\$810

Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in total annual Fund operating expenses or in the Example, affect the Fund’s performance. For the fiscal period from January 24, 2022 (commencement of Fund operations) to December 31, 2022, the Fund’s portfolio turnover rate was 85% of the average value of its portfolio.

Principal Investment Strategies

The Fund is an actively-managed exchange-traded fund (“ETF”) that seeks to achieve its objective by investing principally in the common stocks of U.S. and non-U.S. companies interested in influencing public policy through their lobbying activity in Washington D.C. Strategas Asset Management, LLC (the “Adviser”) considers lobbying a nontraditional and largely unrecognized factor in company analysis. By utilizing publicly available lobbying data in its portfolio selection methodology, the Adviser seeks to capitalize on what the Adviser perceives as a lack of consideration given to lobbying in traditional financial analysis and lobbying’s potential to sway policy outcomes in companies’ favor. The Adviser believes that successful lobbying activity can reduce costly regulatory and legislative harm to a company, impose such harm onto competitors, and/or result in beneficial legislative and regulatory decisions, and that each of these outcomes can have a positive impact on a company’s financial performance and contribute to the long-term appreciation of a company’s stock price.

The Adviser uses publicly disclosed corporate lobbying data filed pursuant to the Lobbying Disclosure Act (the “LDA”) as part of its investment process. The LDA is U.S. federal legislation that requires the disclosure of lobbying activities intended to influence the U.S. federal government. The Adviser uses LDA data to assess the degree to which companies included in the S&P 500, S&P 1000, and MSCI All Country World Indexes lobby the U.S. federal government, which the Adviser refers to as “lobbying intensity.” The Adviser’s methodology determines a company’s lobbying intensity by taking into account the company’s lobbying spend reported under the LDA and the company’s size. The Adviser’s methodology does not take into account the legislation on which a company lobbies or whether a company’s lobbying efforts are successful. The Adviser selects securities for the Fund based on a company’s lobbying intensity only and does not consider a company’s traditional financial metrics when constructing the Fund’s portfolio.

After determining the lobbying intensity of companies in the investment universe, the Adviser determines a weighting and allocation strategy among non-U.S. large capitalization and U.S. large, medium and small capitalization companies based on the Adviser’s asset allocation recommendations. The Adviser’s recommendations reflect its tactical assessment of the balance of risks between large, medium, and small capitalization securities; U.S., international and emerging market issuers; and securities classified as value, core, or growth. The Adviser generally utilizes a thematic investing approach pursuant to which it overweights allocations to assets which it believes the current investment environment favors and underweights allocations to those which it believes the current investment environment

is less favorable. “Thematic” refers to the theses, trends or views that the Adviser believes are prevalent or likely to be prevalent in the market. The Adviser then selects companies with the highest lobbying intensity ratings based on the Adviser’s weighting and allocation recommendations to construct a portfolio of generally 100 securities.

The Adviser assesses lobbying intensity determinations quarterly in connection with quarterly LDA filings, which may lead to portfolio changes based off changes in reported lobbying activity. Other than quarterly purchases and sales, the Adviser may sell a security due to a change in asset allocation recommendations or an issuer’s corporate action.

Under normal circumstances, the Fund invests in at least three countries, including the U.S., and invests at least 40% of its total assets in securities of non-U.S. companies. If conditions are not favorable, the Fund will invest at least 30% of its total assets in securities of non-U.S. companies. The Fund considers a company to be a non-U.S. company if: (i) the company is organized or maintains its principal place of business outside of the U.S. or (ii) the company’s securities are traded principally outside of the U.S. The Fund may invest in emerging market companies.

The Fund may, from time to time, invest a significant portion of its total assets in securities of companies in certain sectors or located in particular countries or regions outside the U.S. As of April 18, 2023, the Fund has significant exposure to securities of companies in each of the industrials, healthcare, and information technology sectors, as well as significant exposure to securities of companies located in the European region.

The Adviser has engaged Vident Investment Advisory, LLC to serve as sub-adviser (“Sub-Adviser”) for the Fund. The Sub-Adviser is responsible for trading portfolio securities for the Fund, including selecting broker-dealers to execute purchase and sale transactions or in connection with any rebalancing or reconstitution of the portfolio, pre- and post-trade compliance, and monitoring of Fund trading activity, subject to the supervision of the Adviser and the Board of Trustees.

Principal Risks

As with all ETFs, there is no guarantee that the Fund will achieve its investment objective. You could lose money by investing in the Fund. **A Fund share is not a bank deposit and it is not insured or guaranteed by the FDIC or any other government agency.** The principal risk factors affecting shareholders’ investments in the Fund are set forth below.

Lobbying Focused Investments Risk – The Adviser’s investment process utilizes lobbying intensity as the primary input when selecting securities for

the Fund's portfolio. The Adviser does not consider a company's traditional financial metrics when constructing the Fund's portfolio. A company's financial performance is determined by a number of factors, and the degree to which a company engages in lobbying activities may have little or no impact on whether the company performs well or poorly financially. Further, a company may be lobbying due to a threat to its operations created by proposed or anticipated regulations and if such lobbying efforts are unsuccessful and the regulations are adopted, the regulations could lead to increased operational costs or other effects causing underperformance. Companies with significant lobbying expenditures may underperform companies with lower lobbying expenditures. The Fund may forego some market opportunities available to funds that do not focus on securities of companies with significant lobbying activity, and therefore the Fund may underperform such other funds. Additionally, U.S. federal law imposes obligations on companies to disclose certain information on lobbying spend. If the law were to change in a manner so as to limit or eliminate such disclosures, it could have a material, negative impact on the Adviser's ability to gather information regarding corporate lobbying spend.

Geographic Focus Risk – To the extent that it focuses its investments on a particular country or geographic region outside the U.S., the Fund may be more susceptible to economic, political, regulatory or other events or conditions affecting issuers and countries within that country or geographic region. As a result, the Fund may be subject to greater price volatility and risk of loss than a fund holding more geographically diverse investments.

European Risk – As of April 18, 2023, the Fund has significant exposure to securities of issuers located in the European region. As a result, the Fund is more exposed to the economic and political risks of Europe and of the European countries in which it invests. Any adverse economic or political events in Europe may cause the Fund's investments to decline in value. The economies and markets of European countries are often closely connected and interdependent, and events in one country in Europe can have an adverse impact on other European countries. Countries in Europe will be significantly affected by the fiscal and monetary controls of the Economic and Monetary Union of the European Union ("EU"). Changes in regulations on trade, decreasing imports or exports, changes in the exchange rate of the Euro, the default or threat of default by an EU member country on its sovereign debt, and recessions among European countries may have a significant adverse effect on the economies of other European countries. In addition, one or more countries may abandon the Euro and/or withdraw from the EU, such as the United Kingdom's ("U.K.'s") formal exit on January 31, 2020. While the U.K left the EU single markets and customs union under the

terms of a new trade agreement effective December 31, 2020, there is still considerable uncertainty relating to the potential consequences associated with the U.K.'s exit and whether the exit will increase the likelihood of other countries also departing the EU.

Equity Market Risk – The risk that stock prices will fall over short or extended periods of time, sometimes rapidly and unpredictably. The value of equity securities will fluctuate in response to factors affecting a particular company, as well as broader market and economic conditions. Broad movements in financial markets may adversely affect the price of the Fund's investments, regardless of how well the companies in which the Fund invests perform. In addition, the impact of any epidemic, pandemic or natural disaster, or widespread fear that such events may occur, could negatively affect the global economy, as well as the economies of individual countries, the financial performance of individual companies and sectors, and the markets in general in significant and unforeseen ways. Any such impact could adversely affect the prices and liquidity of the securities and other instruments in which the Fund invests, which in turn could negatively impact the Fund's performance and cause losses on your investment in the Fund. Moreover, in the event of a company's bankruptcy, claims of certain creditors, including bondholders, will have priority over claims of common stockholders such as the Fund.

Methodology Risk – The Adviser's methodology to determine a company's "lobbying intensity" is derived from publicly available lobbying data filed and disclosed pursuant to the LDA. To the extent that a company fraudulently or accidentally reports incorrect lobbying expenditures, such data may affect the Adviser's methodology and cause securities of a company to be included in or excluded from the Fund's portfolio when such securities otherwise would have been excluded or included, respectively. Further, there may be ways to influence legislation or public policy that may not be legally classified as "lobbying" or reported as such pursuant to the LDA. Additionally, the LDA only covers U.S. federal lobbying and does not include state or local lobbying or the lobbying of foreign governments. To the extent that the data disclosed pursuant to the LDA does not fully capture all lobbying expenditures or is otherwise incomplete, the Adviser's methodology may be affected and result in securities of companies being included or excluded in the portfolio of the Fund that otherwise may have been excluded or included, respectively. The exclusion or inclusion of such securities may negatively affect the value of the Fund's portfolio.

Foreign Company Risk – Investing in foreign companies poses additional risks since political and economic events unique to a country or region will affect those markets and their issuers. These risks will not necessarily affect

the U.S. economy or similar issuers located in the United States. Securities of foreign companies may not be registered with the U.S. Securities and Exchange Commission (the "SEC") and foreign companies are generally not subject to the same level of regulatory controls imposed on U.S. issuers and, as a consequence, there is generally less publicly available information about foreign securities than is available about domestic securities. Income from foreign securities owned by the Fund may be reduced by a withholding tax at the source, which tax would reduce income received from the securities comprising the Fund's portfolio. Foreign securities may also be more difficult to value than securities of U.S. issuers and foreign markets and securities may be less liquid. In addition, periodic U.S. Government restrictions on investments in issuers from certain foreign countries may require the Fund to sell such investments at inopportune times, which could result in losses to the Fund.

Foreign Currency Risk – As a result of the Fund's investments in securities denominated in, and/or receiving revenues in, foreign currencies, the Fund will be subject to currency risk. Currency risk is the risk that foreign currencies will decline in value relative to the U.S. dollar, in which case the dollar value of an investment in the Fund would be adversely affected.

Large Capitalization Risk – The risk that larger, more established companies may be unable to respond quickly to new competitive challenges such as changes in technology and consumer tastes. Larger companies also may not be able to attain the high growth rates of successful smaller companies.

Small and Medium Capitalization Companies Risk – The risk that small and medium capitalization companies in which the Fund may invest may be more vulnerable to adverse business or economic events than larger, more established companies. In particular, small and medium capitalization companies may have limited product lines, markets and financial resources and may depend upon a relatively small management group. Therefore, small capitalization and medium capitalization stocks may be more volatile than those of larger companies. Small capitalization and medium capitalization stocks may be traded over-the-counter or listed on an exchange.

Emerging Market Company Risk – Investments in emerging market companies are considered speculative and subject to heightened risks in addition to the general risks of investing in foreign companies. Unlike more established markets, emerging markets may have governments that are less stable and economies that are less developed. Furthermore, future economic or political crises could lead to price controls, forced mergers, expropriation or confiscatory taxation, seizure, nationalization or creation of government monopolies. The Fund considers an emerging market company

to be a company designated as from an emerging market country by the MSCI All Country World Index.

Active Management Risk – The success of the Fund’s strategy is dependent on the Adviser’s ability and its stock selection process to correctly identify the Fund’s investments. The portfolio securities selected by the Adviser may decline in value or not increase in value when the stock market in general is rising, in which case the Fund could experience losses regardless of the overall performance of the U.S. equity market.

Inflation Risk – Inflation risk is the risk that the value of assets or income from investments will be less in the future as inflation decreases the value of money. As inflation increases, the value of the Fund’s assets can decline. Measures of inflation have increased to levels not experienced in several decades. Uncertainty regarding the magnitude of interest rate increases, and the ability of the Federal Reserve to successfully control inflation, may negatively impact asset prices and increase market volatility.

Liquidity Risk – The risk that certain securities may be difficult or impossible to sell at the time and the price that the Fund would like. The Fund may have to lower the price of the security, sell other securities instead or forego an investment opportunity, any of which could have a negative effect on Fund management or performance.

ETF Risks – The Fund is an ETF and, as a result of this structure, it is exposed to the following risks:

Trading Risk – Shares of the Fund may trade on the NYSE Arca, Inc. (the “Exchange”) above or below their NAV. The NAV of shares of the Fund will fluctuate with changes in the market value of the Fund’s holdings. In addition, although the Fund’s shares are currently listed on the Exchange, there can be no assurance that an active trading market for shares will develop or be maintained. Trading in Fund shares may be halted due to market conditions or for reasons that, in the view of the Exchange, make trading in shares of the Fund inadvisable.

Limited Authorized Participants, Market Makers and Liquidity Providers Risk – Because the Fund is an ETF, only a limited number of institutional investors (known as “Authorized Participants”) are authorized to purchase and redeem shares directly from the Fund.

In addition, there may be a limited number of market makers and/or liquidity providers in the marketplace. To the extent either of the following events occur, Fund shares may trade at a material discount to net asset value (“NAV”) and possibly face delisting: (i) Authorized Participants exit the business or otherwise become unable to process creation and/or

redemption orders and no other Authorized Participants step forward to perform these services, or (ii) market makers and/or liquidity providers exit the business or significantly reduce their business activities and no other entities step forward to perform their functions.

New Fund Risk – Because the Fund is new, investors in the Fund bear the risk that the Fund may not be successful in implementing its investment strategy, may not employ a successful investment strategy, or may fail to attract sufficient assets under management to realize economies of scale, any of which could result in the Fund being liquidated at any time without shareholder approval and at a time that may not be favorable for all shareholders. Such liquidation could have negative tax consequences for shareholders and will cause shareholders to incur expenses of liquidation.

Sector Focus Risk – Because the Fund may, from time to time, be more heavily invested in particular sectors, the value of its shares may be especially sensitive to factors and economic risks that specifically affect those sectors. As a result, the Fund's share price may fluctuate more widely than the value of shares of a mutual fund that invests in a broader range of sectors. The Fund's sector exposures may change over time, as macroeconomic, market, sector and company-specific conditions change.

Industrials Sector Risk – As of April 18, 2023, the Fund has significant exposure to securities of issuers in the industrials sector. The Fund is subject to the risk that the securities of issuers in the industrials sector will underperform the market as a whole due to legislative or regulatory changes, adverse market conditions and/or increased competition affecting the industrials sector. The prices of the securities of companies operating in the industrials sector may fluctuate due to the level and volatility of commodity prices, the exchange value of the dollar, import controls, worldwide competition, liability for environmental damage, depletion of resources, and mandated expenditures for safety and pollution control devices.

Information Technology Sector Risk – As of April 18, 2023, the Fund has significant exposure to securities of issuers in the information technology sector. The information technology sector has been among the most volatile sectors of the stock market. Because the Fund's investments are significantly exposed to companies in the information technology sector, its performance will be significantly affected by developments in that sector. The information technology sector includes companies that offer software and information technology services, manufacturers and distributors of technology hardware and equipment such as communications equipment, cellular phones, computers and peripherals, electronic equipment and related instruments and

semiconductors. Companies in the information technology sector involve greater risk because their revenue and/or earnings tend to be less predictable (and some companies may be experiencing significant losses) and their share prices tend to be more volatile. Certain companies in the information technology sector may have limited product lines, markets or financial resources, or may depend on a limited management group. In addition, these companies are strongly affected by worldwide technological developments, and their products and services may not be economically successful or may quickly become outdated. Investor perception may play a greater role in determining the day-to-day value of information technology stocks than it does in other sectors. Fund investments may decline dramatically in value if anticipated products or services are delayed or cancelled. The risks associated with companies in the information technology sector are magnified in the case of small-cap technology companies.

Healthcare Sector Risk – As of April 18, 2023, the Fund has significant exposure to securities of issuers in the healthcare sector. Companies in the healthcare sector are subject to extensive government regulation and their profitability can be significantly affected by restrictions on government reimbursement for medical expenses, rising costs of medical products and services, pricing pressure (including price discounting), limited product lines, and an increased emphasis on the delivery of healthcare through outpatient services. Companies in the healthcare sector can also be significantly affected by product liability claims, rapid obsolescence of products or services, and patent expirations, as well as government approval of products and services.

Valuation Risk – The risk that a security may be difficult to value. The Fund may value certain securities at a price higher than the price at which they can be sold.

Portfolio Turnover Risk – Due to its investment strategy, the Fund may buy and sell securities frequently. This may result in higher transaction costs and additional capital gains tax liabilities, which may affect the Fund's performance.

Shareholder Concentration Risk – A large percentage of the Fund's shares are held by a small number of shareholders, including persons and entities related to the Adviser. A large redemption by one or more of these shareholders could materially increase the Fund's transaction costs, which would negatively impact the Fund's performance and could cause adverse tax consequences for the remaining shareholders of the Fund.

Performance Information

The Fund commenced operations on January 24, 2022, and therefore does not have performance history for a full calendar year. Once the Fund has completed a full calendar year of operations, a bar chart and table will be included that will provide some indication of the risks of investing in the Fund by showing the variability of the Fund's returns and comparing the Fund's performance to a broad measure of market performance. Of course, the Fund's past performance (before and after taxes) does not necessarily indicate how the Fund will perform in the future.

Current performance information is available on the Fund's website at www.strategasetfs.com or by calling toll-free to 855-457-3637.

Investment Adviser

Strategas Asset Management, LLC serves as investment adviser to the Fund.

Investment Sub-Adviser

Vident Investment Advisory, LLC serves as the sub-adviser to the Fund.

Portfolio Managers

The Fund is jointly and primarily managed by a team of the following professionals:

Strategas Asset Management, LLC

Dan Clifton, Portfolio Manager at Strategas Asset Management, LLC and Head of Policy Research at Strategas Securities, LLC, has served as a lead portfolio manager of the Fund since its inception in 2022.

Courtney Rosenberger, Analyst at Strategas Asset Management, LLC and Managing Director at Strategas Securities, LLC, has served as a lead portfolio manager of the Fund since its inception in 2022.

Nicholas Bohnsack, President and Chief Executive Officer at Strategas Asset Management, LLC and President and Chief Operating Officer at Strategas Securities, LLC, has served as a co-portfolio manager of the Fund since its inception in 2022.

Gerald Hendricks, Director & Senior Portfolio Analyst at Strategas Asset Management, LLC, has served as a co-portfolio manager of the Fund since its inception in 2022.

Vident Investment Advisory, LLC

Rafael Zayas, CFA, Senior Vice President, Head of Portfolio Management and Trading of Vident Investment Advisory, LLC, has served as a portfolio manager of the Fund since its inception in 2022.

Austin Wen, CFA, Portfolio Manager of Vident Investment Advisory, LLC, has served as a portfolio manager of the Fund since its inception in 2022.

Purchase and Sale of Fund Shares

The Fund issues shares to (or redeems shares from) certain institutional investors known as “Authorized Participants” (typically market makers or other broker-dealers) only in large blocks of shares known as “Creation Units.” Creation Unit transactions are conducted in exchange for the deposit or delivery of a portfolio of in-kind securities designated by the Fund and/or cash.

Individual shares of the Fund may only be purchased and sold on the Exchange, other national securities exchanges, electronic crossing networks and other alternative trading systems through your broker-dealer at market prices. Because Fund shares trade at market prices rather than at NAV, Fund shares may trade at a price greater than NAV (premium) or less than NAV (discount). When buying or selling shares in the secondary market, you may incur costs attributable to the difference between the highest price a buyer is willing to pay to purchase shares of the Fund (bid) and the lowest price a seller is willing to accept for shares of the Fund (ask) (the “bid-ask spread”). When available, recent information regarding the Fund’s NAV, market price, premiums and discounts, and bid-ask spreads will be available at www.strategasetfs.com.

Tax Information

The Fund intends to make distributions that may be taxed as ordinary income, qualified dividend income or capital gains, unless you are investing through a tax-deferred arrangement, such as a 401(k) plan or individual retirement account (“IRA”), in which case your distribution will be taxed when withdrawn from the tax-deferred account.

Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase shares of the Fund through a broker-dealer or other financial intermediary (such as a bank), the Fund and its related companies may pay the intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary’s web site for more information.
