Important Disclosures

NAV: The dollar value of a single share, based on the value of the underlying assets of the fund minus its liabilities, divided by the number of shares outstanding. Calculated at the end of each business day.

Market Price: The current price at which shares are bought and sold. The market price returns are based on the official closing price of an ETF share or, if the official closing price isn't available, the midpoint between the national best bid and national best offer ("NBBO") as of the time the ETF calculates current NAV per share, and do not represent the returns you would receive if you traded shares at other times. NAVs are calculated using prices as of 4:00 PM Eastern Time.

Carefully consider the Fund's investment objectives, risk, and charges and expenses. This and other information can be found in the Fund's summary or full prospectus which can be obtained by calling (855) 273-7227 or by visiting strategasetfs.com. Please read the prospectus, carefully before investing.

The Fund is new and has a limited operating history. The Fund may trade securities actively, which could increase its transaction costs (thereby lowering its performance) and could increase the amount of taxes you owe by generating short-term gains, which may be taxed at a higher rate.

An investment in the fund involves risk, including possible loss of principal. In addition to the normal risks associated with investing, the Fund is subject to macro-thematic trend investing strategy risk. Therefore, the value of the Fund may decline if, among other reasons, macro-thematic trends believed to be beneficial to the Fund do not develop as anticipated or maintain over time, or the securities selected for inclusion in the Fund's portfolio do not perform as anticipated. The Fund may be more heavily invested in particular sectors and may be especially sensitive to factors and economic risks that specifically affect those sectors. In addition to the normal risks associated with investing, investments in smaller companies typically exhibit higher volatility.

Strategas Asset Management, LLC serves as the investment advisor of the Fund and Vident Investment Advisory, LLC serves as a sub advisor to the Fund. The Fund is distributed by SEI Investments Distribution Co. (SIDCO), which is not affiliated with Strategas Asset Management, LLC or any of its affiliates.

Shares of any ETF are generally bought and sold at market price (not NAV) and are not individually redeemed from the fund. Brokerage commissions will reduce returns. Indices are unmanaged and do not include the effect of fees, expenses or sales charges. One cannot invest directly in an index.
