# Strategas Global Policy Opportunities ETF

## Investment Objective

The Strategas Global Policy Opportunities ETF (the “Global Policy Opportunities ETF” or the “Fund”) seeks long-term capital appreciation.

## Fund Fees and Expenses

This table describes the fees and expenses that you may pay if you buy, hold and sell shares of the Fund. **You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the table and Example below.**

### Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)

Management Fee	0.65%
Other Expenses	0.00%
Total Annual Fund Operating Expenses	0.65%

## Example

This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other funds.

The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the Fund’s operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

1 Year	3 Years	5 Years	10 Years
\$66	\$208	\$362	\$810

## Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in total annual Fund operating expenses or in the Example, affect the Fund’s performance. For the fiscal year ended December 31, 2024, the Fund’s portfolio turnover rate was 68% of the average value of its portfolio.

## Principal Investment Strategies

---

The Fund is an actively-managed exchange-traded fund (“ETF”) that seeks to achieve its objective by investing principally in the common stocks of U.S. and non-U.S. companies interested in influencing public policy through their lobbying activity in Washington D.C. Strategas Asset Management, LLC (the “Adviser”) considers lobbying a nontraditional and largely unrecognized factor in company analysis. By utilizing publicly available lobbying data in its portfolio selection methodology, the Adviser seeks to capitalize on what the Adviser perceives as a lack of consideration given to lobbying in traditional financial analysis and lobbying’s potential to sway policy outcomes in companies’ favor. The Adviser believes that successful lobbying activity can reduce costly regulatory and legislative harm to a company, impose such harm onto competitors, and/or result in beneficial legislative and regulatory decisions, and that each of these outcomes can have a positive impact on a company’s financial performance and contribute to the long-term appreciation of a company’s stock price.

The Adviser uses publicly disclosed corporate lobbying data filed pursuant to the Lobbying Disclosure Act (the “LDA”) as part of its investment process. The LDA is U.S. federal legislation that requires the disclosure of lobbying activities intended to influence the U.S. federal government. The Adviser uses LDA data to assess the degree to which companies included in the S&P 500, S&P 1000, and MSCI All Country World Indexes lobby the U.S. federal government, which the Adviser refers to as “lobbying intensity.” The Adviser’s methodology determines a company’s lobbying intensity by taking into account the company’s lobbying spend reported under the LDA and the company’s size. The Adviser’s methodology does not take into account the legislation on which a company lobbies or whether a company’s lobbying efforts are successful. The Adviser selects securities for the Fund based on a company’s lobbying intensity only and does not consider a company’s traditional financial metrics when constructing the Fund’s portfolio.

After determining the lobbying intensity of companies in the investment universe, the Adviser determines a weighting and allocation strategy among non-U.S. large capitalization and U.S. large, medium and small capitalization companies based on the Adviser’s asset allocation recommendations. The Adviser’s recommendations reflect its tactical assessment of the balance of risks between large, medium, and small capitalization securities; U.S., international and emerging market issuers; and securities classified as value, core, or growth. The Adviser generally utilizes a thematic investing approach pursuant to which it overweights allocations to assets which it believes the current investment environment favors and underweights allocations to those which it believes the current investment environment

is less favorable. “Thematic” refers to the theses, trends or views that the Adviser believes are prevalent or likely to be prevalent in the market. The Adviser then selects companies with the highest lobbying intensity ratings based on the Adviser’s weighting and allocation recommendations to construct a portfolio of generally 100 securities.

The Adviser assesses lobbying intensity determinations quarterly in connection with quarterly LDA filings, which may lead to portfolio changes based off changes in reported lobbying activity. Other than quarterly purchases and sales, the Adviser may sell a security due to a change in asset allocation recommendations or an issuer’s corporate action.

Under normal circumstances, the Fund invests in at least three countries, including the U.S., and invests at least 40% of its total assets in securities of non-U.S. companies. If conditions are not favorable, the Fund will invest at least 30% of its total assets in securities of non-U.S. companies. The Fund considers a company to be a non-U.S. company if: (i) the company is organized or maintains its principal place of business outside of the U.S. or (ii) the company’s securities are traded principally outside of the U.S. The Fund may invest in emerging market companies.

The Fund may, from time to time, invest a significant portion of its total assets in securities of companies in certain sectors or located in particular countries or regions outside the U.S. As of the date of this Prospectus, the Fund has significant exposure to securities of companies in each of the industrials, healthcare, materials, consumer discretionary, communication services and information technology sectors, as well as significant exposure to securities of companies located in the U.S. and European regions.

The Adviser has engaged Vident Asset Management to serve as sub-adviser (“Sub-Adviser”) for the Fund. The Sub-Adviser is responsible for trading portfolio securities for the Fund, including selecting broker-dealers to execute purchase and sale transactions or in connection with any rebalancing or reconstitution of the portfolio, pre- and post-trade compliance, and monitoring of Fund trading activity, subject to the oversight of the Adviser and the Board of Trustees.

## Principal Risks

---

As with all ETFs, there is no guarantee that the Fund will achieve its investment objective. You could lose money by investing in the Fund. **A Fund share is not a bank deposit and it is not insured or guaranteed by the FDIC or any other government agency.** The principal risk factors affecting shareholders’ investments in the Fund are set forth below.

**Lobbying Focused Investments Risk** – The Adviser’s investment process utilizes lobbying intensity as the primary input when selecting securities for the Fund’s portfolio. The Adviser does not consider a company’s traditional financial metrics when constructing the Fund’s portfolio. A company’s financial performance is determined by a number of factors, and the degree to which a company engages in lobbying activities may have little or no impact on whether the company performs well or poorly financially. Further, a company may be lobbying due to a threat to its operations created by proposed or anticipated regulations and if such lobbying efforts are unsuccessful and the regulations are adopted, the regulations could lead to increased operational costs or other effects causing underperformance. Companies with significant lobbying expenditures may underperform companies with lower lobbying expenditures. The Fund may forego some market opportunities available to funds that do not focus on securities of companies with significant lobbying activity, and therefore the Fund may underperform such other funds. Additionally, U.S. federal law imposes obligations on companies to disclose certain information on lobbying spend. If the law were to change in a manner so as to limit or eliminate such disclosures, it could have a material, negative impact on the Adviser’s ability to gather information regarding corporate lobbying spend.

**Geographic Focus Risk** – To the extent that it focuses its investments on a particular country or geographic region outside the U.S., the Fund may be more susceptible to economic, political, regulatory or other events or conditions affecting issuers and countries within that country or geographic region. As a result, the Fund may be subject to greater price volatility and risk of loss than a fund holding more geographically diverse investments.

**European Risk** – As of the date of this Prospectus, the Fund has significant exposure to securities of issuers located in the European region. As a result, the Fund is more exposed to the economic and political risks of Europe and of the European countries in which it invests. Any adverse economic or political events in Europe may cause the Fund’s investments to decline in value. The economies and markets of European countries are often closely connected and interdependent, and events in one country in Europe can have an adverse impact on other European countries. Countries in Europe will be significantly affected by the fiscal and monetary controls of the Economic and Monetary Union of the European Union (“EU”). Changes in regulations on trade, decreasing imports or exports, changes in the exchange rate of the Euro, the default or threat of default by an EU member country on its sovereign debt, and recessions among European countries may have a significant adverse effect on the economies of other European countries. In addition, one or more countries may abandon the Euro and/or withdraw from the EU,

such as the United Kingdom's ("U.K.'s") formal exit on January 31, 2020. While the U.K left the EU single markets and customs union under the terms of a new trade agreement effective December 31, 2020, there is still considerable uncertainty relating to the potential consequences associated with the U.K.'s exit and whether the exit will increase the likelihood of other countries also departing the EU.

**Geopolitical Risk & Foreign Relations Risk** – U.S. and international markets have experienced significant periods of volatility due to a number of economic, political and other global macro factors. As of the date of this Prospectus, the U.S. is involved in a number of negotiations with foreign entities over alleged mistreatment of U.S. companies, imbalances in trade, tariff rates, currency manipulation, and non-trade non-tariff barriers and activities. Whether these negotiations resolve positively or escalate, changes in the trade relationships between the U.S. and foreign countries could result in positive or negative ramifications for the Fund's holdings. Additionally, escalation or de-escalation in the geopolitical climate, new or resolved conflicts, and changes to the defense budgets of both the U.S. and foreign countries may impact performance of the Fund's holdings.

**U.S. Fiscal Risk** – As of the date of this Prospectus, the U.S. federal government is running fiscal deficits as a percentage of gross domestic product ("GDP") above historical averages. The U.S.' debt to GDP ratio is also elevated. Efforts by the administration to improve the U.S.' fiscal state via reducing spending or increasing revenue could impact certain holdings of the Fund as well as the overall economy of the U.S. Additionally, failure for the U.S. to improve its fiscal state or take necessary actions such as raising the federal debt ceiling could result in U.S. debt being downgraded, which could have follow-on ramifications for the U.S. economy and investing environment. Certain companies held by the Fund rely on the U.S. as a customer and may be negatively impacted by any reductions in available spending or failure by the U.S. to pay its contractors and vendors for their services.

**Equity Market Risk** – The risk that stock prices will fall over short or extended periods of time, sometimes rapidly and unpredictably. The value of equity securities will fluctuate in response to factors affecting a particular company, as well as broader market and economic conditions. Broad movements in financial markets may adversely affect the price of the Fund's investments, regardless of how well the companies in which the Fund invests perform. In addition, the impact of any epidemic, pandemic or natural disaster, or widespread fear that such events may occur, could negatively affect the global economy, as well as the economies of individual countries, the financial performance of individual companies and sectors,

and the markets in general in significant and unforeseen ways. Any such impact could adversely affect the prices and liquidity of the securities and other instruments in which the Fund invests, which in turn could negatively impact the Fund's performance and cause losses on your investment in the Fund. Moreover, in the event of a company's bankruptcy, claims of certain creditors, including bondholders, will have priority over claims of common stockholders such as the Fund.

**Methodology Risk** – The Adviser's methodology to determine a company's "lobbying intensity" is derived from publicly available lobbying data filed and disclosed pursuant to the LDA. To the extent that a company fraudulently or accidentally reports incorrect lobbying expenditures, such data may affect the Adviser's methodology and cause securities of a company to be included in or excluded from the Fund's portfolio when such securities otherwise would have been excluded or included, respectively. Further, there may be ways to influence legislation or public policy that may not be legally classified as "lobbying" or reported as such pursuant to the LDA. Additionally, the LDA only covers U.S. federal lobbying and does not include state or local lobbying or the lobbying of foreign governments. To the extent that the data disclosed pursuant to the LDA does not fully capture all lobbying expenditures or is otherwise incomplete, the Adviser's methodology may be affected and result in securities of companies being included or excluded in the portfolio of the Fund that otherwise may have been excluded or included, respectively. The exclusion or inclusion of such securities may negatively affect the value of the Fund's portfolio.

**Foreign Company Risk** – Investing in foreign companies poses additional risks since political and economic events unique to a country or region will affect those markets and their issuers. These risks will not necessarily affect the U.S. economy or similar issuers located in the United States. Securities of foreign companies may not be registered with the U.S. Securities and Exchange Commission (the "SEC") and foreign companies are generally not subject to the same level of regulatory controls imposed on U.S. issuers and, as a consequence, there is generally less publicly available information about foreign securities than is available about domestic securities. Income from foreign securities owned by the Fund may be reduced by a withholding tax at the source, which tax would reduce income received from the securities comprising the Fund's portfolio. Foreign securities may also be more difficult to value than securities of U.S. issuers and foreign markets and securities may be less liquid. In addition, periodic U.S. Government restrictions on investments in issuers from certain foreign countries may require the Fund to sell such investments at inopportune times, which could result in losses to the Fund.

**Foreign Currency Risk** – As a result of the Fund's investments in securities denominated in, and/or receiving revenues in, foreign currencies, the Fund will be subject to currency risk. Currency risk is the risk that foreign currencies will decline in value relative to the U.S. dollar, in which case the dollar value of an investment in the Fund would be adversely affected.

**Large Capitalization Risk** – The risk that larger, more established companies may be unable to respond quickly to new competitive challenges such as changes in technology and consumer tastes. Larger companies also may not be able to attain the high growth rates of successful smaller companies.

**Small and Medium Capitalization Companies Risk** – The risk that small and medium capitalization companies in which the Fund may invest may be more vulnerable to adverse business or economic events than larger, more established companies. In particular, small and medium capitalization companies may have limited product lines, markets and financial resources and may depend upon a relatively small management group. Therefore, small capitalization and medium capitalization stocks may be more volatile than those of larger companies. Small capitalization and medium capitalization stocks may be traded over-the-counter or listed on an exchange.

**Emerging Market Company Risk** – Investments in emerging market companies are considered speculative and subject to heightened risks in addition to the general risks of investing in foreign companies. Unlike more established markets, emerging markets may have governments that are less stable and economies that are less developed. Furthermore, future economic or political crises could lead to price controls, forced mergers, expropriation or confiscatory taxation, seizure, nationalization or creation of government monopolies. The Fund considers an emerging market company to be a company designated as from an emerging market country by the MSCI All Country World Index.

**Active Management Risk** – The success of the Fund's strategy is dependent on the Adviser's ability and its stock selection process to correctly identify the Fund's investments. The portfolio securities selected by the Adviser may decline in value or not increase in value when the stock market in general is rising, in which case the Fund could experience losses regardless of the overall performance of the U.S. equity market.

**Inflation Risk** – Inflation risk is the risk that the value of assets or income from investments will be less in the future as inflation decreases the value of money. As inflation increases, the value of the Fund's assets can decline. Measures of inflation have increased to levels not experienced in several decades. Uncertainty regarding the magnitude of interest rate increases,

and the ability of the Federal Reserve to successfully control inflation, may negatively impact asset prices and increase market volatility.

**Liquidity Risk** – The risk that certain securities may be difficult or impossible to sell at the time and the price that the Fund would like. The Fund may have to lower the price of the security, sell other securities instead or forego an investment opportunity, any of which could have a negative effect on Fund management or performance.

**ETF Risks** – The Fund is an ETF and, as a result of this structure, it is exposed to the following risks:

**Trading Risk** – Shares of the Fund may trade on the NYSE Arca, Inc. (the “Exchange”) above or below their NAV. The NAV of shares of the Fund will fluctuate with changes in the market value of the Fund’s holdings. In addition, although the Fund’s shares are currently listed on the Exchange, there can be no assurance that an active trading market for shares will develop or be maintained. Trading in Fund shares may be halted due to market conditions or for reasons that, in the view of the Exchange, make trading in shares of the Fund inadvisable.

**Limited Authorized Participants, Market Makers and Liquidity Providers Risk** – Because the Fund is an ETF, only a limited number of institutional investors (known as “Authorized Participants”) are authorized to purchase and redeem shares directly from the Fund. In addition, there may be a limited number of market makers and/or liquidity providers in the marketplace. To the extent either of the following events occur, Fund shares may trade at a material discount to net asset value (“NAV”) and possibly face delisting: (i) Authorized Participants exit the business or otherwise become unable to process creation and/or redemption orders and no other Authorized Participants step forward to perform these services, or (ii) market makers and/or liquidity providers exit the business or significantly reduce their business activities and no other entities step forward to perform their functions.

**Sector Focus Risk** – Because the Fund may, from time to time, be more heavily invested in particular sectors, the value of its shares may be especially sensitive to factors and economic risks that specifically affect those sectors. As a result, the Fund’s share price may fluctuate more widely than the value of shares of a fund that invests in a broader range of sectors. The Fund’s sector exposures may change over time, as macroeconomic, market, sector and company-specific conditions change.

**Industrials Sector Risk** – As of the date of this Prospectus, the Fund has significant exposure to securities of issuers in the industrials sector. The Fund is subject to the risk that the securities of issuers in

the industrials sector will underperform the market as a whole due to legislative or regulatory changes, adverse market conditions and/or increased competition affecting the industrials sector. The prices of the securities of companies operating in the industrials sector may fluctuate due to the level and volatility of commodity prices, the exchange value of the dollar, import controls, worldwide competition, tariffs and trade barriers, liability for environmental damage, depletion of resources, and mandated expenditures for safety and pollution control devices.

**Healthcare Sector Risk** – As of the date of this Prospectus, the Fund has significant exposure to securities of issuers in the healthcare sector. Companies in the healthcare sector are subject to extensive government regulation and their profitability can be significantly affected by restrictions on government reimbursement for medical expenses, rising costs of medical products and services, pricing pressure (including price discounting), limited product lines, tariffs and trade barriers, and an increased emphasis on the delivery of healthcare through outpatient services. Companies in the healthcare sector can also be significantly affected by product liability claims, rapid obsolescence of products or services, and patent expirations, as well as government approval of products and services.

**Materials Sector Risk** – As of the date of this Prospectus, the Fund has significant exposure to securities of issuers in the materials sector. The materials sector includes companies that manufacture chemicals, construction materials, glass, paper, forest products and related packaging products, and metals, minerals and mining companies, including producers of steel. The Fund is subject to the risk that the securities of such issuers will underperform the market as a whole due to legislative or regulatory changes, adverse market conditions and/or increased competition affecting the materials sector. The prices of the securities of companies operating in the materials sector may fluctuate widely due to the level and volatility of commodity prices, the exchange value of the U.S. dollar, tariffs and trade barriers, supply chain disruptions, import controls, worldwide competition, liability for environmental damage, depletion of resources, and mandated expenditures for safety and pollution control devices.

**Consumer Discretionary Sector Risk** – As of the date of this Prospectus, the Fund has significant exposure to securities of issuers in the consumer discretionary sector. The manufacturing segment of the consumer discretionary sector includes automotive, household durable goods, leisure equipment and textiles and apparel. The services segment includes hotels, restaurants and other leisure facilities, media

production and services, and consumer retailing and services. The Fund is subject to the risk that the securities of such issuers will underperform the market as a whole due to legislative or regulatory changes, adverse market conditions and/or increased competition affecting the consumer discretionary sector. Many companies in the manufacturing segment rely on foreign nations for sourcing of raw materials and/or final goods. Changes in tariff rates imposed by the U.S., or addition of new trade barriers, could create additional costs or uncertainty. Additionally, U.S. imposition of tariffs could create retaliatory actions abroad which negatively impact multinational companies' non-U.S. customer basis. The performance of companies operating in the consumer discretionary sector has historically been closely tied to the performance of the overall economy, and also is affected by economic growth, consumer confidence, tax cuts or hikes on individuals, attitudes and spending. Changes in demographics and consumer tastes also can affect the demand for, and success of, consumer products and services in the marketplace. Moreover, the consumer discretionary sector encompasses those businesses that tend to be the most sensitive to economic cycles.

**Information Technology Sector Risk** – As of the date of this Prospectus, the Fund has significant exposure to securities of issuers in the information technology sector. The information technology sector has been among the most volatile sectors of the stock market. Because the Fund's investments are significantly exposed to companies in the information technology sector, its performance will be significantly affected by developments in that sector. The information technology sector includes companies that offer software and information technology services, manufacturers and distributors of technology hardware and equipment such as communications equipment, cellular phones, computers and peripherals, electronic equipment and related instruments and semiconductors. Companies in the information technology sector involve greater risk because their revenue and/or earnings tend to be less predictable (and some companies may be experiencing significant losses) and their share prices tend to be more volatile. Certain companies in the information technology sector may have limited product lines, markets or financial resources, or may depend on a limited management group. Companies within the information technology sector may rely on foreign countries for sourcing of components or materials for products, as well as manufacture of finished goods. As such, changes in trade relationships between the U.S. and foreign countries may impact these companies in the form of higher costs, reduced market access, and higher uncertainty. In addition, these companies are strongly affected by worldwide technological developments, and their products and services

may not be economically successful or may quickly become outdated. Investor perception may play a greater role in determining the day-to-day value of information technology stocks than it does in other sectors. Fund investments may decline dramatically in value if anticipated products or services are delayed or cancelled. The risks associated with companies in the information technology sector are magnified in the case of small-cap technology companies.

**Communication Services Sector Risk** – As of the date of this Prospectus, the Fund has significant exposure to securities of issuers in the communication services sector. The Fund is subject to the risk that the securities of issuers in the communication services sector will underperform the market as a whole due to legislative or regulatory changes, adverse market conditions and/or increased competition affecting the communication services sector. The communication services sector may be dominated by a small number of companies which may lead to additional volatility in the sector. Communication services companies are particularly vulnerable to the potential obsolescence of products and services due to technological advances and the innovation of competitors. Communication services companies may also be affected by other competitive pressures, such as pricing competition, as well as research and development costs, substantial capital requirements, and government regulation. Fluctuating domestic and international demand, shifting demographics, and often unpredictable changes in consumer demand can drastically affect a communication services company's profitability. Compliance with governmental regulations, delays or failure to receive regulatory approvals, or the enactment of new regulatory requirements may negatively affect the business of communication services companies.

**Valuation Risk** – The risk that a security may be difficult to value. The Fund may value certain securities at a price higher than the price at which they can be sold.

**Portfolio Turnover Risk** – Due to its investment strategy, the Fund may buy and sell securities frequently. This may result in higher transaction costs and additional capital gains tax liabilities, which may affect the Fund's performance.

**Shareholder Concentration Risk** – A large percentage of the Fund's shares are held by a small number of shareholders, including persons and entities related to the Adviser. A large redemption by one or more of these shareholders could materially increase the Fund's transaction costs, which would negatively impact the Fund's performance and could cause adverse tax consequences for the remaining shareholders of the Fund.

Performance Information

The bar chart and the performance table below illustrate the risks and volatility of an investment in the Fund by showing changes in the Fund's performance from year to year and by showing how the Fund's average annual total returns for 1 year and since inception compare with those of a broad measure of market performance. Of course, the Fund's past performance (before and after taxes) does not necessarily indicate how the Fund will perform in the future.

Current performance information is available on the Fund's website at [www.strategasetfs.com/sagp](http://www.strategasetfs.com/sagp) or by calling toll-free to 855-457-3637.

BEST QUARTER	WORST QUARTER
11.19%	(5.78)%
12/31/2023	9/30/2023

The performance information shown above is based on a calendar year. The Fund's performance from 01/01/25 to 03/31/25 was 5.50%.

*Average Annual Total Returns for Periods Ended December 31, 2024*

This table compares the Fund's average annual total returns for the periods ended December 31, 2024 to those of an appropriate broad-based index.

After-tax returns are calculated using the historical highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on an investor's tax situation and may differ from those shown. After-tax returns shown are not relevant to investors who hold their Fund shares through tax-deferred arrangements, such as 401(k) plans or individual retirement accounts ("IRAs").

<b>Global Policy Opportunities ETF</b>	<b>1 Year</b>	<b>Since Inception (1/24/22)</b>
Fund Returns Before Taxes	12.13%	5.92%
Fund Returns After Taxes on Distributions	11.55%	5.61%
Fund Returns After Taxes on Distributions and Sale of Fund Shares	7.59%	4.56%
MSCI All Country World Index (Net) (reflects no deduction for fees, expenses or taxes (except foreign withholding taxes))	17.49%	7.91%

## **Investment Adviser**

---

Strategas Asset Management, LLC serves as investment adviser to the Fund.

## **Investment Sub-Adviser**

---

Vident Asset Management serves as the sub-adviser to the Fund.

## **Portfolio Managers**

---

The Fund is jointly and primarily managed by a team of the following professionals:

### **Strategas Asset Management, LLC**

Dan Clifton, Portfolio Manager at Strategas Asset Management, LLC and Head of Policy Research at Strategas Securities, LLC, has served as a lead portfolio manager of the Fund since its inception in 2022.

Courtney Rosenberger Gelman, Analyst at Strategas Asset Management, LLC and Managing Director at Strategas Securities, LLC, has served as a lead portfolio manager of the Fund since its inception in 2022.

Nicholas Bohnsack, President and Chief Executive Officer at Strategas Asset Management, LLC and President and Chief Operating Officer at Strategas Securities, LLC, has served as a co-portfolio manager of the Fund since its inception in 2022.

Gerald Hendricks, Director & Senior Portfolio Analyst at Strategas Asset Management, LLC, has served as a co-portfolio manager of the Fund since its inception in 2022.

## **Vident Asset Management**

Rafael Zayas, CFA, Senior Vice President, Head of Portfolio Management and Trading of Vident Asset Management, has served as a portfolio manager of the Fund since its inception in 2022.

Austin Wen, CFA, Senior Portfolio Manager of Vident Asset Management has served as a portfolio manager of the Fund since its inception in 2022.

*For important information about the purchase and sale of Fund shares, taxes and financial intermediary compensation, please turn to “Summary Information about the Purchase and Sale of Fund Shares, Taxes and Financial Intermediary Compensation” on page 34 of the prospectus.*

# Strategas Macro Thematic Opportunities ETF

## Investment Objective

The Strategas Macro Thematic Opportunities ETF (the “Macro Thematic Opportunities ETF” or the “Fund”) seeks long-term capital appreciation.

## Fund Fees and Expenses

This table describes the fees and expenses that you may pay if you buy, hold and sell shares of the Fund. **You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the table and Example below.**

### Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)

Management Fee	0.65%
Other Expenses	0.00%
Acquired Fund Fees and Expenses (“AFFE”) <sup>1</sup>	<u>0.01%</u>
Total Annual Fund Operating Expenses <sup>2</sup>	0.66%

<sup>1</sup> AFFE are indirect fees and expenses that the Fund incurs from investing in shares of other investment companies, including mutual funds, money market funds and exchange-traded funds.

<sup>2</sup> The Total Annual Fund Operating Expenses in this fee table do not correlate to the expense ratio in the Fund’s Financial Highlights because the Financial Highlights include only the direct operating expenses incurred by the Fund, and exclude AFFE.

## Example

This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other funds.

The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the Fund’s operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

1 Year	3 Years	5 Years	10 Years
\$67	\$211	\$368	\$822

## Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in total annual Fund operating expenses or in the Example, affect the Fund’s performance. For the fiscal year ended December 31, 2024, the Fund’s portfolio turnover rate was 91% of the average value of its portfolio.

## Principal Investment Strategies

---

The Fund is an actively-managed exchange-traded fund (“ETF”) that seeks to achieve its objective by investing principally in common stocks of U.S. companies that Strategas Asset Management, LLC (the “Adviser”) believes most highly correlate to macro-thematic trends. “Macro” is a “top-down” analysis approach in investing that focuses on the inputs that are generally out of a company’s control, such as the overall economy, government fiscal and monetary policy changes, cultural and socioeconomic developments or trends, and developments arising from global crises including pandemics, wars, or financial distress. “Thematic” refers to the theses, trends or views that the Adviser believes are prevalent or likely to be prevalent in the market. For example, certain macro-thematic trends as of the date of this Prospectus could include, but are not necessarily limited to, artificial intelligence, cash flow aristocrats (i.e., companies with the ability to generate cash to self-fund during changing market conditions), de-globalization (i.e., in response to supply chain disruptions during recent years, companies “near-shoring” more operations and countries investing more in their own energy, food supplies, and security), and industrial power renaissance (i.e. the process of updating aging utility infrastructure in response to increased demand for power due to artificial intelligence requirements, the adoption of electric vehicles, and the development of new manufacturing facilities and data centers).

The Adviser seeks to have the Fund outperform the broader U.S. equity market by leveraging the Adviser’s research-driven approach to identifying and investing in three to five macro-thematic trends at any given time. The Adviser weights each macro-thematic trend approximately equally in the Fund’s portfolio. After a macro-thematic trend is selected, the Adviser uses a number of analytical tools, including technical, fundamental, qualitative and quantitative analyses, to identify the security characteristics that the Adviser believes are most highly correlated to the macro-thematic trend. For example, if inflation is selected as a macro-thematic trend, the Adviser would attempt to determine characteristics of companies that would benefit

the most from the resulting impact on the costs of goods and services in the market. The Adviser seeks to identify securities of companies that possess such characteristics and thus which could provide exposure to the macro-thematic trend. The Adviser may adjust the portfolio of securities based on changes to the macro-thematic trends or in an individual security. The Adviser continuously monitors the risk/reward profile of each macro-thematic trend to ensure the integrity of the investment thesis and the relevancy of its constituents.

The Fund may invest in securities of companies with any market capitalization, though certain liquidity parameters are required for a security to be considered. The Fund may, from time to time, invest a significant portion of its total assets in securities of companies in certain sectors. The Fund's sector exposures will likely change over time, as macroeconomic, market, sector and company-specific conditions change.

The Adviser has engaged Vident Asset Management to serve as sub-adviser ("Sub-Adviser") for the Fund. The Sub-Adviser is responsible for trading portfolio securities for the Fund, including selecting broker-dealers to execute purchase and sale transactions or in connection with any rebalancing or reconstitution of the portfolio, pre- and post-trade compliance, and monitoring of Fund trading activity, subject to the oversight of the Adviser and the Board of Trustees.

## Principal Risks

---

As with all ETFs, there is no guarantee that the Fund will achieve its investment objective. You could lose money by investing in the Fund. **A Fund share is not a bank deposit and it is not insured or guaranteed by the FDIC or any other government agency.** The principal risk factors affecting shareholders' investments in the Fund are set forth below.

**Macro-Thematic Trend Investing Strategy Risk** – The Adviser selects securities for the Fund's portfolio pursuant to a macro-thematic trend investment strategy. The value of the Fund may decline if, among other reasons, macro-thematic trends believed to be beneficial to the Fund do not develop as anticipated or maintain over time, securities selected for inclusion in the Fund's portfolio due to their security characteristics that the Adviser believes are most highly correlated to a macro-thematic trend do not perform as anticipated, the Adviser fails to identify or declines to include in the Fund's portfolio profitable companies that would have been beneficial to a macro-thematic trend, or other investment strategies generally outperform macro-thematic trends investing based on a variety of factors.

**Equity Market Risk** – The risk that stock prices will fall over short or extended periods of time, sometimes rapidly and unpredictably. The value of equity securities will fluctuate in response to factors affecting a particular company, as well as broader market and economic conditions. Broad movements in financial markets may adversely affect the price of the Fund's investments, regardless of how well the companies in which the Fund invests perform. In addition, the impact of any epidemic, pandemic or natural disaster, or widespread fear that such events may occur, could negatively affect the global economy, as well as the economies of individual countries, the financial performance of individual companies and sectors, and the markets in general in significant and unforeseen ways. Any such impact could adversely affect the prices and liquidity of the securities and other instruments in which the Fund invests, which in turn could negatively impact the Fund's performance and cause losses on your investment in the Fund. Moreover, in the event of a company's bankruptcy, claims of certain creditors, including bondholders, will have priority over claims of common stockholders such as the Fund.

**Inflation Risk** – Inflation risk is the risk that the value of assets or income from investments will be less in the future as inflation decreases the value of money. As inflation increases, the value of the Fund's assets can decline. Measures of inflation have increased to levels not experienced in several decades. Uncertainty regarding the magnitude of interest rate increases, and the ability of the Federal Reserve to successfully control inflation, may negatively impact asset prices and increase market volatility.

**Large Capitalization Risk** – The risk that larger, more established companies may be unable to respond quickly to new competitive challenges such as changes in technology and consumer tastes. Larger companies also may not be able to attain the high growth rates of successful smaller companies.

**Small and Medium Capitalization Companies Risk** – The risk that small and medium capitalization companies in which the Fund may invest may be more vulnerable to adverse business or economic events than larger, more established companies. In particular, small and medium capitalization companies may have limited product lines, markets and financial resources and may depend upon a relatively small management group. Therefore, small capitalization and medium capitalization stocks may be more volatile than those of larger companies. Small capitalization and medium capitalization stocks may be traded over-the-counter or listed on an exchange.

**Active Management Risk** – The success of the Fund's strategy is dependent on the Adviser's ability and its stock selection process to correctly identify the Fund's investments. The portfolio securities selected by the Adviser may decline in value or not increase in value when the stock

market in general is rising, in which case the Fund could experience losses regardless of the overall performance of the U.S. equity market.

**Liquidity Risk** – The risk that certain securities may be difficult or impossible to sell at the time and the price that the Fund would like. The Fund may have to lower the price of the security, sell other securities instead or forego an investment opportunity, any of which could have a negative effect on Fund management or performance.

**ETF Risks** – The Fund is an ETF and, as a result of this structure, it is exposed to the following risks:

**Trading Risk** – Shares of the Fund may trade on NYSE Arca, Inc. (the “Exchange”) above or below their NAV. The NAV of shares of the Fund will fluctuate with changes in the market value of the Fund’s holdings. In addition, although the Fund’s shares are currently listed on the Exchange, there can be no assurance that an active trading market for shares will develop or be maintained. Trading in Fund shares may be halted due to market conditions or for reasons that, in the view of the Exchange, make trading in shares of the Fund inadvisable.

**Limited Authorized Participants, Market Makers and Liquidity Providers Risk** – Because the Fund is an ETF, only a limited number of institutional investors (known as “Authorized Participants”) are authorized to purchase and redeem shares directly from the Fund. In addition, there may be a limited number of market makers and/or liquidity providers in the marketplace. To the extent either of the following events occur, Fund shares may trade at a material discount to net asset value (“NAV”) and possibly face delisting: (i) Authorized Participants exit the business or otherwise become unable to process creation and/or redemption orders and no other Authorized Participants step forward to perform these services, or (ii) market makers and/or liquidity providers exit the business or significantly reduce their business activities and no other entities step forward to perform their functions.

**Valuation Risk** – The risk that a security may be difficult to value. The Fund may value certain securities at a price higher than the price at which they can be sold.

**Portfolio Turnover Risk** – Due to its investment strategy, the Fund may buy and sell securities frequently. This may result in higher transaction costs and additional capital gains tax liabilities, which may affect the Fund’s performance.

**Sector Focus Risk** – Because the Fund may, from time to time, be more heavily invested in particular sectors, the value of its shares may be

especially sensitive to factors and economic risks that specifically affect those sectors. As a result, the Fund's share price may fluctuate more widely than the value of shares of a fund that invests in a broader range of sectors. The Fund's sector exposures will likely change over time, as macroeconomic, market, sector and company-specific conditions change.

**Shareholder Concentration Risk** – A large percentage of the Fund's shares are held by a small number of shareholders, including persons and entities related to the Adviser. A large redemption by one or more of these shareholders could materially increase the Fund's transaction costs, which would negatively impact the Fund's performance and could cause adverse tax consequences for the remaining shareholders of the Fund.

## Performance Information

The bar chart and the performance table below illustrate the risks and volatility of an investment in the Fund by showing changes in the Fund's performance from year to year and by showing how the Fund's average annual total returns for 1 year and since inception compare with those of a broad measure of market performance. Of course, the Fund's past performance (before and after taxes) does not necessarily indicate how the Fund will perform in the future.

Current performance information is available on the Fund's website at [www.strategasetfs.com/samt](http://www.strategasetfs.com/samt) or by calling toll-free to 855-457-3637.

BEST QUARTER	WORST QUARTER
10.10%	(3.86)%
3/31/2024	9/30/2023

The performance information shown above is based on a calendar year. The Fund's performance from 01/01/25 to 03/31/25 was 0.17%.

### *Average Annual Total Returns for Periods Ended December 31, 2024*

This table compares the Fund's average annual total returns for the periods ended December 31, 2024 to those of an appropriate broad-based index.

After-tax returns are calculated using the historical highest individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Actual after-tax returns depend on an investor's tax situation and may differ from those shown. After-tax returns shown are not relevant to investors who hold their Fund shares through tax-deferred arrangements, such as 401(k) plans or individual retirement accounts ("IRAs").

<b>Macro Thematic Opportunities ETF</b>	<b>1 Year</b>	<b>Since Inception (1/24/22)</b>
Fund Returns Before Taxes	27.99%	6.63%
Fund Returns After Taxes on Distributions	27.48%	6.30%
Fund Returns After Taxes on Distributions and Sale of Fund Shares	16.78%	5.07%
S&P 500 Index (Net) (reflects no deduction for fees, expenses or taxes (except foreign withholding taxes))	24.50%	11.51%

## **Investment Adviser**

---

Strategas Asset Management, LLC serves as the investment adviser to the Fund.

## **Investment Sub-Adviser**

---

Vident Asset Management serves as the sub-adviser to the Fund.

## **Portfolio Managers**

---

The Fund is jointly and primarily managed by a team of the following professionals:

### **Strategas Asset Management, LLC**

Jason Trennert, Chairman of Strategas Asset Management, LLC and Chairman and Chief Executive Officer of Strategas Securities, LLC, has served as a lead portfolio manager of the Fund since its inception in 2022.

Nicholas Bohnsack, President and Chief Executive Officer at Strategas Asset Management, LLC and President and Chief Operating Officer at

Strategas Securities, LLC, has served as a lead portfolio manager of the Fund since its inception in 2022.

Ryan Grabinski, Managing Director at both Strategas Asset Management, LLC and Strategas Securities, LLC, has served as a co-portfolio manager of the Fund since its inception in 2022.

Gerald Hendricks, Director & Senior Portfolio Analyst at Strategas Asset Management, LLC, has served as a co-portfolio manager of the Fund since its inception in 2022.

### **Vident Asset Management**

Rafael Zayas, CFA, Senior Vice President, Head of Portfolio Management and Trading of Vident Asset Management, has served as a portfolio manager of the Fund since its inception in 2022.

Austin Wen, CFA, Senior Portfolio Manager of Vident Asset Management, has served as a portfolio manager of the Fund since its inception in 2022.

# Strategas Macro Momentum ETF

## Investment Objective

The Strategas Macro Momentum ETF (the “Macro Momentum ETF” or the “Fund”) seeks long-term capital appreciation.

## Fund Fees and Expenses

This table describes the fees and expenses that you may pay if you buy, hold and sell shares of the Fund. **You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the table and Example below.**

### **Annual Fund Operating Expenses (expenses that you pay each year as a percentage of the value of your investment)**

Management Fee	0.55%
Other Expenses <sup>1</sup>	1.47%
Acquired Fund Fees and Expenses (“AFFE”) <sup>2</sup>	0.01%
Total Annual Fund Operating Expenses <sup>3</sup>	2.03%
Less Fee Reductions and/or Expense Reimbursements <sup>4</sup>	(1.37)%
Total Annual Fund Operating Expenses After Fee Reductions and/or Expense Reimbursements <sup>5</sup>	0.66%

<sup>1</sup> Other Expenses have been restated to reflect current fees.

<sup>2</sup> AFFE are indirect fees and expenses that the Fund incurs from investing in shares of other investment companies, including mutual funds, money market funds and exchange-traded funds.

<sup>3</sup> The Total Annual Fund Operating Expenses in this fee table do not correlate to the expense ratio in the Fund’s Financial Highlights because (i) Other Expenses have been restated to reflect current fees and (ii) the Financial Highlights include only the direct operating expenses incurred by the Fund, and exclude AFFE.

<sup>4</sup> Strategas Asset Management, LLC (the “Adviser” or “Strategas”) has contractually agreed to waive fees and/or to reimburse expenses to the extent necessary to keep Total Annual Fund Operating Expenses (excluding any interest, taxes, brokerage commissions and other costs and expenses relating to the securities that are purchased and sold by the Fund, dividend and interest expenses on securities sold short, AFFE, fees and expenses incurred in connection with tax reclaim recovery services, other expenditures which are capitalized in accordance with generally accepted accounting principles, and non-routine expenses) (collectively, “excluded expenses”) from exceeding 0.65% of the average daily net assets of the Fund until April 30, 2026 (the “contractual expense limit”). In addition, the Adviser may receive from the Fund the difference between the Total Annual Fund Operating Expenses (not including excluded expenses) and the contractual expense limit to recoup all or a portion of its prior fee

waivers or expense reimbursements made during the rolling three-year period preceding the date of the recoupment if at any point Total Annual Fund Operating Expenses (not including excluded expenses) are below the contractual expense limit (i) at the time of the fee waiver and/or expense reimbursement and (ii) at the time of the recoupment. The agreement may be terminated: (i) by the Board of Trustees (the “Board”) of The Advisors’ Inner Circle Fund III (the “Trust”), for any reason at any time; or (ii) by the Adviser, upon ninety (90) days’ prior written notice to the Trust, effective as of the close of business on April 30, 2026.

- <sup>5</sup> The Total Annual Fund Operating Expenses After Fee Reductions and/or Expense Reimbursements in this fee table do not correlate to the expense ratio in the Fund’s Financial Highlights because the Financial Highlights include only the direct operating expenses incurred by the Fund, and exclude AFPE.

## Example

This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other funds.

The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the Fund’s operating expenses (including one year of capped expenses in each period) remain the same. Although your actual costs may be higher or lower, based on these assumptions your costs would be:

1 Year	3 Years	5 Years	10 Years
\$67	\$504	\$966	\$2,249

## Portfolio Turnover

The Fund pays transaction costs, such as commissions, when it buys and sells securities (or “turns over” its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in total annual Fund operating expenses or in the Example, affect the Fund’s performance. For the fiscal period from April 3, 2024 (commencement of Fund operations) to December 31, 2024, the Fund’s portfolio turnover rate was 122% of the average value of its portfolio.

## Principal Investment Strategies

The Fund is an actively-managed exchange-traded fund (“ETF”) that principally invests in common stocks of U.S. companies, real estate investment trusts (“REITs”), master limited partnerships (“MLPs”), American Depositary Receipts (“ADRs”), shares of other investment companies,

including ETFs, exchange-traded products (“ETPs”) and closed-end funds, and shares of business development companies (“BDCs”). The Fund seeks to achieve its objective by investing principally in a portfolio of approximately 20–50 such assets with a focus on buying and holding the assets for as long as their technical characteristics warrant while seeking to limit losses in periods of market decline by allocating additional Fund assets to defensive alternatives, such as treasury ETFs, gold ETPs or cash. Catalysts for a more defensive posture would include a deterioration to the technical attributes for the market as a whole, including such inputs as downside moving average crosses, changes to trend following and momentum tools, an expansion in individual securities trading to new lows (each as described below), and the emergence of a relative outperformance from traditionally defensive assets like treasuries or gold.

The Adviser uses a macro momentum approach in implementing its investment strategy. “Macro” is a “top-down” analysis approach in investing that focuses on the inputs that are generally out of a company’s control, such as the overall economy, government fiscal and monetary policy changes, cultural and socioeconomic developments or trends, and developments arising from global crises including pandemics, wars, or financial distress. “Momentum” is a security’s tendency to show upward or downward price trend in both its absolute and relative performance in the intermediate 3- to 12- month period.

Momentum tools such as absolute and relative rate of change, new highs/ lows, moving average crosses, and technical studies like the Relative Strength Index (“RSI”) and the Moving Average Convergence/Divergence indicator (“MACD”) are used to identify securities in this regard. Absolute rate of change measures a security’s price performance over a set number of days. High rates of change reflect positive price momentum, while low rates of change reflect negative price momentum. A relative rate of change is a security’s price momentum relative to a benchmark index or a peer group. A new high or low is the highest or lowest closing price for a security over a set number of days. A moving average refers to the average price of a security over a specified time period. Upward sloping moving averages generally reflect an uptrend in the security’s price, while downward sloping moving averages generally reflect a downtrend in the security’s price. When the shorter-term average (e.g., 50 days) crosses above or below the longer-term moving average (e.g., 200 days), a positive or negative trend signal is noted. The RSI measures the speed and change of price movements of a security over a set time period. The MACD shows the relationship between two exponential moving averages of a security’s price and is used to help identify price trends, measure momentum, and identify entry points for buying or selling securities.

The Adviser employs a suite of proprietary macro, technical, and behavioral inputs to improve individual security selection and portfolio characteristics to provide a tactical and macro momentum driven approach. Trend following, an investment approach that makes decisions to buy, sell, or hold a security based on the underlying security's price characteristics, and momentum inputs, including new highs/lows, moving average crosses, RSI, MACD, and proprietary momentum ranks, are all utilized in the security selection process.

The Fund may invest in securities of companies with any market capitalization, though certain liquidity parameters are required for a security to be considered. The Fund may, from time to time, invest a significant portion of its total assets in securities of companies in certain sectors. The Fund's sector exposures will likely change over time, as macroeconomic, market, sector and company-specific conditions change.

The Adviser has engaged Vident Asset Management to serve as sub-adviser ("Sub-Adviser") for the Fund. The Sub-Adviser is responsible for trading portfolio securities for the Fund, including selecting broker-dealers to execute purchase and sale transactions or in connection with any rebalancing or reconstitution of the portfolio, pre- and post-trade compliance, and monitoring of Fund trading activity, subject to the oversight of the Adviser and the Board of Trustees.

## Principal Risks

---

As with all ETFs, there is no guarantee that the Fund will achieve its investment objective. You could lose money by investing in the Fund. **A Fund share is not a bank deposit and it is not insured or guaranteed by the FDIC or any other government agency.** The principal risk factors affecting shareholders' investments in the Fund are set forth below.

**Macro Momentum Investing Strategy Risk** – The Adviser selects securities for the Fund's portfolio pursuant to a macro momentum investment strategy. The value of the Fund may decline if, among other reasons, securities selected for inclusion in the Fund's portfolio due to their security characteristics that the Adviser believes are most highly correlated to a macro momentum strategy do not perform as anticipated, the Adviser fails to identify or declines to include in the Fund's portfolio profitable companies that would have been beneficial to a macro momentum portfolio, or other investment strategies generally outperform a macro momentum strategy of investing based on a variety of factors.

**Equity Market Risk** – The risk that stock prices will fall over short or extended periods of time, sometimes rapidly and unpredictably. The

value of equity securities will fluctuate in response to factors affecting a particular company, as well as broader market and economic conditions. Broad movements in financial markets may adversely affect the price of the Fund's investments, regardless of how well the companies in which the Fund invests perform. In addition, the impact of any epidemic, pandemic or natural disaster, or widespread fear that such events may occur, could negatively affect the global economy, as well as the economies of individual countries, the financial performance of individual companies and sectors, and the markets in general in significant and unforeseen ways. Any such impact could adversely affect the prices and liquidity of the securities and other instruments in which the Fund invests, which in turn could negatively impact the Fund's performance and cause losses on your investment in the Fund. Moreover, in the event of a company's bankruptcy, claims of certain creditors, including bondholders, will have priority over claims of common stockholders such as the Fund.

**Active Management Risk** – The success of the Fund's strategy is dependent on the Adviser's ability and its stock selection process to correctly identify the Fund's investments. The portfolio securities selected by the Adviser may decline in value or not increase in value when the stock market in general is rising, in which case the Fund could experience losses regardless of the overall performance of the U.S. equity market.

**Large Capitalization Risk** – The risk that larger, more established companies may be unable to respond quickly to new competitive challenges such as changes in technology and consumer tastes. Larger companies also may not be able to attain the high growth rates of successful smaller companies.

**Small and Medium Capitalization Companies Risk** – The risk that small and medium capitalization companies in which the Fund may invest may be more vulnerable to adverse business or economic events than larger, more established companies. In particular, small and medium capitalization companies may have limited product lines, markets and financial resources and may depend upon a relatively small management group. Therefore, small capitalization and medium capitalization stocks may be more volatile than those of larger companies. Small capitalization and medium capitalization stocks may be traded over-the-counter or listed on an exchange.

**Sector Focus Risk** – Because the Fund may, from time to time, be more heavily invested in particular sectors, the value of its shares may be especially sensitive to factors and economic risks that specifically affect those sectors. As a result, the Fund's share price may fluctuate more widely than the value of shares of a fund that invests in a broader range

of sectors. The Fund's sector exposures will likely change over time, as macroeconomic, market, sector and company-specific conditions change.

**ETF Risks** – The Fund is an ETF and, as a result of this structure, it is exposed to the following risks:

**Trading Risk** – Shares of the Fund may trade on NYSE Arca, Inc. (the "Exchange") above or below their NAV. The NAV of shares of the Fund will fluctuate with changes in the market value of the Fund's holdings. In addition, although the Fund's shares are currently listed on the Exchange, there can be no assurance that an active trading market for shares will develop or be maintained. Trading in Fund shares may be halted due to market conditions or for reasons that, in the view of the Exchange, make trading in shares of the Fund inadvisable.

**Limited Authorized Participants, Market Makers and Liquidity Providers Risk** – Because the Fund is an ETF, only a limited number of institutional investors (known as "Authorized Participants") are authorized to purchase and redeem shares directly from the Fund. In addition, there may be a limited number of market makers and/or liquidity providers in the marketplace. To the extent either of the following events occur, Fund shares may trade at a material discount to net asset value ("NAV") and possibly face delisting: (i) Authorized Participants exit the business or otherwise become unable to process creation and/or redemption orders and no other Authorized Participants step forward to perform these services, or (ii) market makers and/or liquidity providers exit the business or significantly reduce their business activities and no other entities step forward to perform their functions.

**Gold Risk** – Price movements in gold may fluctuate quickly and dramatically, have a historically low correlation with the returns of the stock and bond markets, and may not correlate to price movements in other asset classes. Some factors that impact the price of gold include, but are not limited to, overall market movements, changes in interest rates, changes in the global supply and demand for gold, the quantity of gold imports and exports, factors that impact gold production, such as drought, floods and weather conditions, technological advances in the processing and mining of gold, an increase in the hedging of precious metals, such as gold, and changes in economic and/or political conditions, including regulatory developments.

**U.S. Government Securities Risk** – Although U.S. Government securities are considered to be among the safest investments, they are not guaranteed against price movements due to changing interest rates. Obligations issued by some U.S. Government agencies are backed by the U.S. Treasury, while others are backed solely by the ability of the agency to borrow from the U.S.

Treasury or by the agency's own resources. Therefore, such obligations are not backed by the full faith and credit of the U.S. Government.

**New Fund Risk** – Because the Fund is new, investors in the Fund bear the risk that the Fund may not be successful in implementing its investment strategy, may not employ a successful investment strategy, or may fail to attract sufficient assets under management to realize economies of scale, any of which could result in the Fund being liquidated at any time without shareholder approval and at a time that may not be favorable for all shareholders. Such liquidation could have negative tax consequences for shareholders and will cause shareholders to incur expenses of liquidation.

**Portfolio Turnover Risk** – Due to its investment strategy, the Fund may buy and sell securities frequently. This may result in higher transaction costs and additional capital gains tax liabilities, which may affect the Fund's performance.

**Shareholder Concentration Risk** – A large percentage of the Fund's shares are held by a small number of shareholders, including persons and entities related to the Adviser. A large redemption by one or more of these shareholders could materially increase the Fund's transaction costs, which would negatively impact the Fund's performance and could cause adverse tax consequences for the remaining shareholders of the Fund.

**Liquidity Risk** – The risk that certain securities may be difficult or impossible to sell at the time and the price that the Fund would like. The Fund may have to lower the price of the security, sell other securities instead or forego an investment opportunity, any of which could have a negative effect on Fund management or performance.

**Inflation Risk** – Inflation risk is the risk that the value of assets or income from investments will be less in the future as inflation decreases the value of money. As inflation increases, the value of the Fund's assets can decline. Measures of inflation have increased to levels not experienced in several decades. Uncertainty regarding the magnitude of interest rate increases, and the ability of the Federal Reserve to successfully control inflation, may negatively impact asset prices and increase market volatility.

**Depository Receipts Risk** – Investments in depository receipts may be less liquid and more volatile than the underlying securities in their primary trading market. If a depository receipt is denominated in a different currency than its underlying securities, the Fund will be subject to the currency risk of both the investment in the depository receipt and the underlying security. Holders of depository receipts may have limited or no rights to take action with respect to the underlying securities or to compel the issuer of the

receipts to take action. The prices of depositary receipts may differ from the prices of securities upon which they are based.

**Foreign Company Risk** – Investing in foreign companies poses additional risks since political and economic events unique to a country or region will affect those markets and their issuers. These risks will not necessarily affect the U.S. economy or similar issuers located in the United States. Securities of foreign companies may not be registered with the U.S. Securities and Exchange Commission (the “SEC”) and foreign companies are generally not subject to the same level of regulatory controls imposed on U.S. issuers and, as a consequence, there is generally less publicly available information about foreign securities than is available about domestic securities. Income from foreign securities owned by the Fund may be reduced by a withholding tax at the source, which tax would reduce income received from the securities comprising the Fund’s portfolio. Foreign securities may also be more difficult to value than securities of U.S. issuers and foreign markets and securities may be less liquid. In addition, periodic U.S. Government restrictions on investments in issuers from certain foreign countries may require the Fund to sell such investments at inopportune times, which could result in losses to the Fund.

**Foreign Currency Risk** – As a result of the Fund’s investments in securities denominated in, and/or receiving revenues in, foreign currencies, the Fund will be subject to currency risk. Currency risk is the risk that foreign currencies will decline in value relative to the U.S. dollar, in which case the dollar value of an investment in the Fund would be adversely affected.

**REITs Risk** – REITs are pooled investment vehicles that own, and usually operate, income-producing real estate. REITs are susceptible to the risks associated with direct ownership of real estate, such as the following: declines in property values; increases in property taxes, operating expenses, interest rates or competition; overbuilding; zoning changes; and losses from casualty or condemnation. REITs typically incur fees that are separate from those of the Fund. Accordingly, the Fund’s investments in REITs will result in the layering of expenses such that shareholders will indirectly bear a proportionate share of the REITs’ operating expenses, in addition to paying Fund expenses. REIT operating expenses are not reflected in the fee table and example in this prospectus.

**Master Limited Partnerships (MLPs) Risk** – MLPs are limited partnerships in which the ownership units are publicly traded. MLPs often own several properties or businesses (or own interests) that are related to oil and gas industries or other natural resources, but they also may finance other projects. To the extent that an MLP’s interests are all in a particular industry, the MLP will be negatively impacted by economic events adversely

impacting that industry. Additional risks of investing in a MLP also include those involved in investing in a partnership as opposed to a corporation, such as limited control of management, limited voting rights and tax risks. MLPs may be subject to state taxation in certain jurisdictions, which will have the effect of reducing the amount of income paid by the MLP to its investors.

**Investments in Investment Company Risk** – When the Fund invests in an investment company, including closed-end funds and ETFs, in addition to directly bearing the expenses associated with its own operations, it will bear a pro rata portion of the investment company's expenses. Further, while the risks of owning shares of an investment company generally reflect the risks of owning the underlying investments of the investment company, the Fund may be subject to additional or different risks than if the Fund had invested directly in the underlying investments. For example, the lack of liquidity in an ETF could result in its share price being more volatile than that of the underlying portfolio securities. Certain closed-end investment companies issue a fixed number of shares that trade on a stock exchange at a premium or a discount to their net asset value ("NAV"). As a result, a closed-end fund's share price fluctuates based on what another investor is willing to pay rather than on the market value of the securities in the fund.

**Business Development Companies ("BDCs") Risk** – Investments in closed-end funds that are BDCs may be subject to a high degree of risk. BDCs typically invest in small and medium-sized companies that may not have access to public equity markets for capital raising. As a result, a BDC's portfolio typically will include a substantial amount of securities purchased in private placements, and the portfolio may carry risks similar to those of a private equity or venture capital fund. Securities that are not publicly registered may be difficult to value and may be difficult to sell at a price representative of their intrinsic value.

**Tax Risk** – Income from certain ETPs that invest in commodities and other non-security based asset classes, as well as direct investments in such alternative asset classes such as gold, may not be qualifying income for purposes of the qualifying income test that must be met by the Fund in order to qualify as a regulated investment company ("RIC") under Subchapter M of the Internal Revenue Code of 1986, as amended (the "Code"). The Fund will seek to restrict its income from direct investments in such alternative investments that do not generate qualifying income to a maximum of 10% of its gross income (when combined with its other investments that produce non-qualifying income) to comply with certain qualifying income tests necessary for the Fund to qualify as a RIC under the Code. However, there is no guarantee that the Fund will be successful in this regard. If the

Fund fails to qualify as a RIC and to avail itself of certain relief provisions, it would be subject to tax at the regular corporate rate without any deduction for distributions to shareholders, and its distributions would generally be taxable as dividends. Please see the Fund's Statement of Additional Information (the "SAI") for a more detailed discussion, including the availability of certain relief provisions for certain failures by the Fund to qualify as a RIC. The tax treatment of certain commodity investments and other non-security based instruments may be affected by future regulatory or legislative changes that could affect the character, timing and/or amount of the Fund's taxable income or gains and distributions. The Fund's pursuit of its investment objective will potentially be limited by the Fund's intention to qualify for treatment as a RIC. The Fund can make certain investments, the treatment of which is unclear under the Code and could adversely affect the Fund's ability to qualify as a RIC.

**Valuation Risk** – The risk that a security may be difficult to value. The Fund may value certain securities at a price higher than the price at which they can be sold.

## **Performance Information**

---

The Fund commenced operations on April 3, 2024, and therefore does not have performance history for a full calendar year. Once the Fund has completed a full calendar year of operations, a bar chart and table will be included that will provide some indication of the risks of investing in the Fund by showing the variability of the Fund's returns and comparing the Fund's performance to a broad measure of market performance. Of course, the Fund's past performance (before and after taxes) does not necessarily indicate how the Fund will perform in the future.

Current performance information is available on the Fund's website at [www.strategasetfs.com/samm](http://www.strategasetfs.com/samm) or by calling toll-free to 855-457-3637.

## **Investment Adviser**

---

Strategas Asset Management, LLC serves as the investment adviser to the Fund.

## **Investment Sub-Adviser**

---

Vident Asset Management serves as the sub-adviser to the Fund.

## Portfolio Managers

---

The Fund is jointly and primarily managed by a team of the following professionals:

### **Strategas Asset Management, LLC**

Chris Verrone, Partner & Head of Technical & Macro Research at Strategas Securities, LLC, has served as a lead portfolio manager of the Fund since its inception in 2024.

Nicholas Bohnsack, President and Chief Executive Officer at Strategas Asset Management, LLC and President and Chief Operating Officer at Strategas Securities, LLC, has served as a lead portfolio manager of the Fund since its inception in 2024.

Todd Sohn, Managing Director of Technical & ETF Research at Strategas Securities, LLC, has served as a co-portfolio manager of the Fund since its inception in 2024.

Gerald Hendricks, Director & Senior Portfolio Analyst at Strategas Asset Management, LLC, has served as a co-portfolio manager of the Fund since its inception in 2024.

### **Vident Asset Management**

Rafael Zayas, CFA, Senior Vice President, Head of Portfolio Management and Trading of Vident Asset Management, has served as a portfolio manager of the Fund since its inception in 2024.

Austin Wen, CFA, Senior Portfolio Manager of Vident Asset Management, has served as a portfolio manager of the Fund since its inception in 2024.

*For important information about the purchase and sale of Fund shares, taxes and financial intermediary compensation, please turn to “Summary Information about the Purchase and Sale of Fund Shares, Taxes and Financial Intermediary Compensation” on page 34 of the prospectus.*

# Summary Information about the Purchase and Sale of Fund Shares, Taxes and Financial Intermediary Compensation

The Funds issue shares to (or redeems shares from) certain institutional investors known as “Authorized Participants” (typically market makers or other broker-dealers) only in large blocks of shares known as “Creation Units.” Creation Unit transactions are conducted in exchange for the deposit or delivery of a portfolio of in-kind securities designated by the Funds and/or cash.

Individual shares of the Funds may only be purchased and sold on the Exchange, other national securities exchanges, electronic crossing networks and other alternative trading systems through your broker-dealer at market prices. Because Fund shares trade at market prices rather than at NAV, Fund shares may trade at a price greater than NAV (premium) or less than NAV (discount). When buying or selling shares in the secondary market, you may incur costs attributable to the difference between the highest price a buyer is willing to pay to purchase shares of a Fund (bid) and the lowest price a seller is willing to accept for shares of the Fund (ask) (the “bid-ask spread”). When available, recent information regarding a Fund’s NAV, market price, premiums and discounts, and bid-ask spreads will be available at [www.strategasetfs.com](http://www.strategasetfs.com).

## Tax Information

The Funds intend to make distributions that may be taxed as ordinary income, qualified dividend income or capital gains, unless you are investing through a tax-deferred arrangement, such as a 401(k) plan or individual retirement account (“IRA”), in which case your distribution will be taxed when withdrawn from the tax-deferred account.

## Payments to Broker-Dealers and Other Financial Intermediaries

If you purchase shares of the Funds through a broker-dealer or other financial intermediary (such as a bank), the Funds and their related companies may pay the intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend a Fund over another investment. Ask your salesperson or visit your financial intermediary’s web site for more information.

## **More Information about the Funds' Investment Objectives and Strategies**

---

### **Investment Objectives**

The Global Policy Opportunities ETF, Macro Thematic Opportunities ETF and Macro Momentum ETF each has an investment objective of long-term capital appreciation. The investment objective of each Fund is not a fundamental policy and may be changed by the Board of Trustees (the "Board") of The Advisors' Inner Circle Fund III (the "Trust") without shareholder approval.

### **Investment Strategies**

#### ***Global Policy Opportunities ETF***

The Fund is an actively-managed ETF that seeks to achieve its objective by investing principally in the common stocks of U.S. and non-U.S. companies interested in influencing public policy through their lobbying activity in Washington D.C. The Adviser considers lobbying a nontraditional and largely unrecognized factor in company analysis. By utilizing publicly available lobbying data in its portfolio selection methodology, the Adviser seeks to capitalize on what the Adviser perceives as a lack of consideration given to lobbying in traditional financial analysis and lobbying's potential to sway policy outcomes in companies' favor. The Adviser believes that successful lobbying activity can reduce costly regulatory and legislative harm to a company, impose such harm onto competitors, and/or result in beneficial legislative and regulatory decisions, and that each of these outcomes can have a positive impact on a company's financial performance and contribute to the long-term appreciation of a company's stock price.

The Adviser uses publicly disclosed corporate lobbying data filed pursuant to the LDA as part of its investment process. The LDA is U.S. federal legislation that requires the disclosure of lobbying activities intended to influence the U.S. federal government. The LDA requires that registered entities file quarterly reports of lobbying activity on behalf of each client, including corporations in which the Fund may invest, within 20 days of quarter-end. Registered entities may be outside lobbying firms hired by the corporation, but corporations may be their own registered entities if they employ lobbyists directly. Information that is required under the LDA includes, but is not limited to, an estimate of the company's lobbying expenses for the quarter, issues that were lobbied on, where lobbying activity took place (such as the U.S. House or the Senate), and whether the lobbying is on behalf of a foreign entity. Registered entities lobbying on behalf of non-U.S. companies are required to file a lobbying report as well

and, depending on circumstances outlined under the LDA, the registered entity may be required to disclose if a foreign entity has a specific interest in the lobbying.

The Adviser uses LDA data to assess the degree to which companies included in the S&P 500, S&P 1000, and MSCI All Country World Indexes lobby the U.S. federal government, which the Adviser refers to as "lobbying intensity." The Adviser's methodology determines a company's lobbying intensity by taking into account the company's lobbying spend reported under the LDA and the company's size. The Adviser's methodology does not take into account the legislation on which a company lobbies or whether a company's lobbying efforts are successful. The Adviser selects securities for the Fund based on a company's lobbying intensity only and does not consider a company's traditional financial metrics when constructing the Fund's portfolio.

After determining the lobbying intensity of companies in the investment universe, the Adviser determines a weighting and allocation strategy among non-U.S. large capitalization and U.S. large, medium and small capitalization companies based on the Adviser's asset allocation recommendations. The Adviser's recommendations reflect its tactical assessment of the balance of risks between large, medium, and small capitalization securities; U.S., international and emerging market issuers; and securities classified as value, core, or growth. The Adviser generally utilizes a thematic investing approach pursuant to which it overweights allocations to assets which it believes the current investment environment favors and underweights allocations to those which it believes the current investment environment is less favorable. "Thematic" refers to the theses, trends or views that the Adviser believes are prevalent or likely to be prevalent in the market. The Adviser then selects companies with the highest lobbying intensity ratings based on the Adviser's weighting and allocation recommendations to construct a portfolio of generally 100 securities.

The Adviser assesses lobbying intensity determinations quarterly in connection with quarterly LDA filings, which may lead to portfolio changes based off changes in reported lobbying activity. Other than quarterly purchases and sales, the Adviser may sell a security due to a change in asset allocation recommendations or an issuer's corporate action.

Under normal circumstances, the Fund invests in at least three countries, including the U.S., and invests at least 40% of its total assets in securities of non-U.S. companies. If conditions are not favorable, the Fund will invest at least 30% of its total assets in securities of non-U.S. companies. The Fund considers a company to be a non-U.S. company if: (i) the company is organized or maintains its principal place of business outside of the U.S. or

(ii) the company's securities are traded principally outside of the U.S. The Fund may invest in emerging market companies.

The Fund may, from time to time, invest a significant portion of its total assets in securities of companies in certain sectors or located in particular countries or regions outside the U.S. As of the date of this Prospectus, the Fund has significant exposure to securities of companies in each of the industrials, healthcare, materials, consumer discretionary, communication services and information technology sectors, as well as significant exposure to securities of companies located in the U.S. and European regions.

The Fund may engage in active and frequent trading of portfolio securities to achieve its principal investment strategies.

The Adviser has engaged Vident Asset Management to serve as sub-adviser for the Fund. The Sub-Adviser is responsible for trading portfolio securities for the Fund, including selecting broker-dealers to execute purchase and sale transactions or in connection with any rebalancing or reconstitution of the portfolio, pre- and post-trade compliance, and monitoring of Fund trading activity, subject to the oversight of the Adviser and the Board of Trustees.

### ***Macro Thematic Opportunities ETF***

The Fund is an actively-managed ETF that seeks to achieve its objective by investing principally in common stocks of U.S. companies that the Adviser believes most highly correlate to macro-thematic trends. "Macro" is a "top-down" analysis approach in investing that focuses on the inputs that are generally out of a company's control, such as the overall economy, government fiscal and monetary policy changes, cultural and socioeconomic developments or trends, and developments arising from global crises including pandemics, wars, or financial distress. "Thematic" refers to the theses, trends or views that the Adviser believes are prevalent or likely to be prevalent in the market. For example, certain macro-thematic trends as of the date of this Prospectus could include, but are not necessarily limited to, artificial intelligence, cash flow aristocrats (i.e., companies with the ability to generate cash to self-fund during changing market conditions), de-globalization (i.e., in response to supply chain disruptions during recent years, companies "near-shoring" more operations and countries investing more in their own energy, food supplies, and security), and industrial power renaissance (i.e. the process of updating aging utility infrastructure in response to increased demand for power due to artificial intelligence requirements, the adoption of electric vehicles and the development of new manufacturing facilities and data centers).

The Adviser seeks to have the Fund outperform the broader U.S. equity market by leveraging the Adviser's research-driven approach to identifying and investing in three to five macro-thematic trends at any given time. The Adviser weights each macro-thematic trend approximately equally in the Fund's portfolio. After a macro-thematic trend is selected, the Adviser uses a number of analytical tools, including technical, fundamental, qualitative and quantitative analyses, to identify the security characteristics that the Adviser believes are most highly correlated to the macro-thematic trend. For example, if inflation is selected as a macro-thematic trend, the Adviser would attempt to determine characteristics of companies that would benefit the most from the resulting impact on the costs of goods and services in the market. The Adviser seeks to identify securities of companies that possess such characteristics and thus which could provide exposure to the macro-thematic trend. The Adviser may adjust the portfolio of securities based on changes to the macro-thematic trends or in an individual security. The Adviser continuously monitors the risk/reward profile of each macro-thematic trend to ensure the integrity of the investment thesis and the relevancy of its constituents.

The Fund may invest in securities of companies with any market capitalization, though certain liquidity parameters are required for a security to be considered. Liquidity parameters include securities with a 20-day average volume of greater or equal to 100,000 shares per day or where the Fund would be less than 20% of a security's trading volume for that trading day. The Fund may, from time to time, invest a significant portion of its total assets in securities of companies in certain sectors. The Fund's sector exposures will likely change over time, as macroeconomic, market, sector and company-specific conditions change.

The selling of securities is generally undertaken when the Adviser changes one of the selected macro-thematic trends, whether that be removing, replacing, or rebalancing a macro-thematic trend and its constituent securities. The Adviser may sell a specific security associated with a macro-thematic trend for security specific considerations, such as a change in view on the security relationship to the macro-thematic trend or an external impact unrelated to the macro-thematic trend that changes a security's relevance. The Fund may engage in active and frequent trading of portfolio securities to achieve its principal investment strategies.

The Adviser has engaged Vident Asset Management to serve as sub-adviser for the Fund. The Sub-Adviser is responsible for trading portfolio securities for the Fund, including selecting broker-dealers to execute purchase and sale transactions or in connection with any rebalancing or reconstitution of the portfolio, pre- and post-trade compliance, and monitoring of Fund

trading activity, subject to the oversight of the Adviser and the Board of Trustees.

### ***Macro Momentum ETF***

The Fund is an actively-managed ETF that principally invests in common stocks of U.S. companies, REITs, MLPs, ADRs, shares of other investment companies, including ETFs, ETPs and closed-end funds, and shares of BDCs. The Fund seeks to achieve its objective by investing principally in a portfolio of approximately 20–50 such assets with a focus on buying and holding the assets for as long as their technical characteristics warrant while seeking to limit losses in periods of market decline by allocating additional Fund assets to defensive alternatives, such as treasury ETFs, gold ETPs or cash. Catalysts for a more defensive posture would include a deterioration to the technical attributes for the market as a whole, including such inputs as downside moving average crosses, changes to trend following and momentum tools, an expansion in individual securities trading to new lows (each as described below), and the emergence of a relative outperformance from traditionally defensive assets like treasuries or gold.

The Adviser uses a macro momentum approach in implementing its investment strategy. “Macro” is a “top-down” analysis approach in investing that focuses on the inputs that are generally out of a company’s control, such as the overall economy, government fiscal and monetary policy changes, cultural and socioeconomic developments or trends, and developments arising from global crises including pandemics, wars, or financial distress. “Momentum” is a security’s tendency to show upward or downward price trend in both its absolute and relative performance in the intermediate 3- to 12- month period.

Momentum tools such as absolute and relative rate of change, new highs/ lows, moving average crosses, and technical studies like RSI and MACD are used to identify securities in this regard. Absolute rate of change measures a security’s price performance over a set number of days. High rates of change reflect positive price momentum, while low rates of change reflect negative price momentum. A relative rate of change is a security’s price momentum relative to a benchmark index or a peer group. A new high or low is the highest or lowest closing price for a security over a set number of days. A moving average refers to the average price of a security over a specified time period. Upward sloping moving averages generally reflect an uptrend in the security’s price, while downward sloping moving averages generally reflect a downtrend in the security’s price. When the shorter-term average (e.g., 50 days) crosses above or below the longer-term moving average (e.g., 200 days), a positive or negative trend signal is noted. The RSI measures the speed and change of price movements of a

security over a set time period. The MACD shows the relationship between two exponential moving averages of a security's price and is used to help identify price trends, measure momentum, and identify entry points for buying or selling securities.

The Adviser employs a suite of proprietary macro, technical, and behavioral inputs to improve individual security selection and portfolio characteristics to provide a tactical and macro momentum driven approach. Specifically, the Adviser utilizes: (i) a trend model, which seeks to identify positive and negative trends among asset classes, markets, sectors, groups, and securities; (ii) a sentiment model, which seeks to identify excessively optimistic or pessimistic investor sentiment; and (iii) a security screening process, which seeks to identify securities with positive or negative moving average crosses and those trading at new highs or new lows. Trend following, an investment approach that makes decisions to buy, sell, or hold a security based on the underlying security's price characteristics, and momentum inputs, including new highs/lows, moving average crosses, RSI, MACD, and proprietary momentum ranks, are all utilized in the security selection process.

The Fund may invest in securities of companies with any market capitalization, though certain liquidity parameters are required for a security to be considered. Specifically, the Adviser examines the average daily volume of a security over a 20-day period to ensure entry and exit points can be achieved without adverse impacts to price. The Fund may, from time to time, invest a significant portion of its total assets in securities of companies in certain sectors. The Fund's sector exposures will likely change over time, as macroeconomic, market, sector and company-specific conditions change.

The Adviser has engaged Vident Asset Management to serve as Sub-Adviser for the Fund. The Sub-Adviser is responsible for trading portfolio securities for the Fund, including selecting broker-dealers to execute purchase and sale transactions or in connection with any rebalancing or reconstitution of the portfolio, pre- and post-trade compliance, and monitoring of Fund trading activity, subject to the oversight of the Adviser and the Board of Trustees.

### ***All Funds***

The investments and strategies described in this prospectus are those that each Fund uses under normal conditions. During unusual economic or market conditions, or for temporary defensive or liquidity purposes, a Fund may, but is not obligated to, invest up to 100% of its assets in money market instruments and other cash equivalents that would not ordinarily be

consistent with its investment objective. If a Fund invests in this manner, it may cause the Fund to forgo greater investment returns for the safety of principal and the Fund may therefore not achieve its investment objective. A Fund will only do so if the Adviser believes that the risk of loss outweighs the opportunity to pursue the Fund's investment objective.

This prospectus describes each Fund's principal investment strategies, and each Fund will normally invest in the types of securities and other investments described in this prospectus. In addition to the securities and other investments and strategies described in this prospectus, a Fund also may invest to a lesser extent in other securities, use other strategies and engage in other investment practices that are not part of its principal investment strategies. These investments and strategies, as well as those described in this prospectus, are described in detail in the Funds' Statement of Additional Information (the "SAI") (for information on how to obtain a copy of the SAI see the back cover of this prospectus). Of course, there is no guarantee that a Fund will achieve its investment goals.

## **More Information about Risk**

---

Investing in each Fund involves risk and there is no guarantee that any Fund will achieve its goals. The Adviser's judgments about the markets, the economy, or companies may not anticipate actual market movements, economic conditions or company performance, and these judgments may affect the return on your investment. In fact, no matter how good of a job the Adviser does, you could lose money on your investment in a Fund, just as you could with similar investments.

The value of your investment in a Fund is based on the value of the securities the Fund holds. These prices change daily due to economic and other events that affect particular companies and other issuers. These price movements, sometimes called volatility, may be greater or lesser depending on the types of securities a Fund owns and the markets in which they trade. The effect on a Fund of a change in the value of a single security will depend on how widely the Fund diversifies its holdings. The principal risk factors affecting shareholders' investments in the Funds (in alphabetical order) are set forth below.

**Active Management Risk** (*All Funds*) – Each Fund is subject to the risk that the Adviser's judgments about the attractiveness, value, or potential appreciation of the Fund's investments may prove to be incorrect. In addition, the prices of common stocks move up and down in response to corporate earnings and developments, economic and market conditions and anticipated events. Individual issuers may report poor results or be negatively affected by industry and/or economic trends and developments. A

Fund's investment success depends on the skill of the Adviser in evaluating, selecting and monitoring the portfolio assets. If the Adviser's conclusions about growth rates or securities values are incorrect, the Fund may not perform as anticipated.

**Business Development Companies ("BDCs") Risk** (*Macro Momentum ETF*) – Investments in closed-end funds that are BDCs may be subject to a high degree of risk. BDCs typically invest in small and medium-sized companies that may not have access to public equity markets for capital raising. As a result, a BDC's portfolio typically will include a substantial amount of securities purchased in private placements, and the portfolio may carry risks similar to those of a private equity or venture capital fund. Securities that are not publicly registered may be difficult to value and may be difficult to sell at a price representative of their intrinsic value.

**Depository Receipts Risk** (*Macro Momentum ETF*) – American Depositary Receipts ("ADRs") are typically trust receipts issued by a U.S. bank or trust company that evidence an indirect interest in underlying securities issued by a foreign entity. Global Depositary Receipts ("GDRs"), European Depositary Receipts ("EDRs"), and other types of depository receipts (collectively, "Depository Receipts") are typically issued by non-U.S. banks or financial institutions to evidence an interest in underlying securities issued by either a U.S. or a non-U.S. entity. Investments in non-U.S. issuers through ADRs, GDRs, EDRs, and other types of Depository Receipts generally involve risks applicable to other types of investments in non-U.S. issuers. Investments in Depository Receipts may be less liquid and more volatile than the underlying securities in their primary trading market. If a Depository Receipt is denominated in a different currency than its underlying securities, the Fund will be subject to the currency risk of both the investment in the Depository Receipt and the underlying security. The values of Depository Receipts may decline for a number of reasons relating to the issuers or sponsors of the Depository Receipts, including, but not limited to, insolvency of the issuer or sponsor. Holders of Depository Receipts may have limited or no rights to take action with respect to the underlying securities or to compel the issuer of the receipts to take action. The prices of Depository Receipts may differ from the prices of securities upon which they are based. In addition, there is risk involved in investing in unsponsored depository receipts, as there may be less information available about the underlying issuer than there is about an issuer of sponsored depository receipts and the prices of unsponsored depository receipts may be more volatile than those of sponsored depository receipts.

**Emerging Market Company Risk** (*Global Policy Opportunities ETF*) – Investments in emerging market companies are considered speculative

and subject to heightened risks in addition to the general risks of investing in foreign companies. Unlike more established markets, emerging markets may have governments that are less stable and economies that are less developed. Furthermore, future economic or political crises could lead to price controls, forced mergers, expropriation or confiscatory taxation, seizure, nationalization or creation of government monopolies. The Fund considers an emerging market company to be a company designated as from an emerging market country by the MSCI All Country World Index.

**Equity Market Risk** (*All Funds*) – Because a Fund invests in equity securities, the Fund is subject to the risk that stock prices will fall over short or extended periods of time. Historically, the equity markets have moved in cycles, and the value of the Fund's securities may fluctuate drastically from day to day. Individual companies may report poor results or be negatively affected by industry and/or economic trends and developments. The prices of securities issued by such companies may suffer a decline in response. The market as a whole may not favor the types of investments a Fund makes. Many factors can adversely affect a security's performance, including both general financial market conditions and factors related to a specific company, industry or geographic region. In addition, the impact of any epidemic, pandemic or natural disaster, or widespread fear that such events may occur, could negatively affect the global economy, as well as the economies of individual countries, the financial performance of individual companies and sectors, and the markets in general in significant and unforeseen ways. Any such impact could adversely affect the prices and liquidity of the securities and other instruments in which a Fund invests, which in turn could negatively impact the Fund's performance and cause losses on your investment in the Fund. Recent examples include pandemic risks related to COVID-19 and aggressive measures taken worldwide in response by governments, including closing borders, restricting international and domestic travel, and the imposition of prolonged quarantines of large populations, and by businesses, including changes to operations and reducing staff. During a general economic downturn in the securities markets, multiple asset classes may be negatively affected. In the case of foreign stocks, these fluctuations will reflect international economic and political events, as well as changes in currency valuations relative to the U.S. dollar. These factors contribute to price volatility, which is a principal risk of investing in a Fund.

**ETF Risks** (*All Funds*) – The Funds are ETFs and, as a result of this structure, they are exposed to the following risks:

**Trading Risk** – Although Fund shares are listed for trading on a listing exchange, there can be no assurance that an active trading market for

such shares will develop or be maintained. Secondary market trading in a Fund's shares may be halted by a listing exchange because of market conditions or for other reasons. In addition, trading in a Fund's shares is subject to trading halts caused by extraordinary market volatility pursuant to "circuit breaker" rules. There can be no assurance that the requirements necessary to maintain the listing of a Fund's shares will continue to be met or will remain unchanged.

Shares of a Fund may trade at, above or below their most recent NAV. The per share NAV of a Fund is calculated at the end of each business day and fluctuates with changes in the market value of a Fund's holdings since the prior most recent calculation. The trading prices of a Fund's shares will fluctuate continuously throughout trading hours based on market supply and demand. The trading prices of a Fund's shares may deviate significantly from NAV during periods of market volatility. These factors, among others, may lead to a Fund's shares trading at a premium or discount to NAV. However, given that shares can be created and redeemed only in Creation Units at NAV, the Adviser does not believe that large discounts or premiums to NAV will exist for extended periods of time. While the creation/redemption feature is designed to make it likely that a Fund's shares normally will trade close to a Fund's NAV, exchange prices are not expected to correlate exactly with a Fund's NAV due to timing reasons as well as market supply and demand factors. In addition, disruptions to creations and redemptions or the existence of extreme volatility may result in trading prices that differ significantly from NAV. If a shareholder purchases at a time when the market price of a Fund is at a premium to its NAV or sells at time when the market price is at a discount to the NAV, the shareholder may sustain losses.

Investors buying or selling shares of a Fund in the secondary market will pay brokerage commissions or other charges imposed by brokers as determined by that broker. Brokerage commissions are often a fixed amount and may be a significant proportional cost for investors seeking to buy or sell relatively small amounts of shares. In addition, secondary market investors will also incur the cost of the difference between the price that an investor is willing to pay for shares (the "bid" price) and the price at which an investor is willing to sell shares (the "ask" price). This difference in bid and ask prices is often referred to as the "spread" or "bid/ask spread." The bid/ask spread varies over time for shares based on trading volume and market liquidity and is generally lower if a Fund's shares have more trading volume and market liquidity and higher if a Fund's shares have little trading volume and market liquidity. Further, increased market volatility may cause increased bid/ask spreads. Due to the costs of buying or selling shares of a Fund, including bid/ask spreads,

frequent trading of such shares may significantly reduce investment results and an investment in a Fund's shares may not be advisable for investors who anticipate regularly making small investments.

**Limited Authorized Participants, Market Makers and Liquidity Providers Risk** – Only an Authorized Participant may engage in creation or redemption transactions directly with a Fund. A Fund has a limited number of financial institutions that may act as Authorized Participants. In addition, there may be a limited number of market makers and/or liquidity providers in the marketplace. To the extent either of the following events occur, Fund shares may trade at a material discount to NAV and possibly face delisting: (i) Authorized Participants exit the business or otherwise become unable to process creation and/or redemption orders and no other Authorized Participants step forward to perform these services, or (ii) market makers and/or liquidity providers exit the business or significantly reduce their business activities and no other entities step forward to perform their functions. An active trading market for shares of a Fund may not develop or be maintained, and, particularly during times of market stress, Authorized Participants or market makers may step away from their respective roles in making a market in shares of a Fund and in executing purchase or redemption orders. This could, in turn, lead to variances between the market price of a Fund's shares and the value of its underlying securities.

**Foreign Company Risk** (*Global Policy Opportunities ETF and Macro Momentum ETF*) – Investments in securities of foreign companies can be more volatile than investments in U.S. companies. Diplomatic, political, or economic developments, including nationalization or appropriation, could affect investments in foreign companies. Foreign securities markets generally have less trading volume and less liquidity than U.S. markets. In addition, the value of securities denominated in foreign currencies, and of dividends from such securities, can change significantly when foreign currencies strengthen or weaken relative to the U.S. dollar. Financial statements of foreign issuers are governed by different accounting, auditing, and financial reporting standards than the financial statements of U.S. issuers. Thus, there may be less information publicly available about foreign issuers than about most U.S. issuers. Some foreign governments levy withholding taxes against dividend and interest income. Although in some countries a portion of these taxes are recoverable, the non-recovered portion will reduce the income received from the securities comprising a Fund's portfolio. Any spread of an infectious illness, public health threat or similar issue could reduce consumer demand or economic output, result in market closures, travel restrictions or quarantines, and generally have a significant impact on the economies of the affected country and other countries with which it does business, which in turn could adversely affect a

Fund's investments in that country and other affected countries. Additionally, periodic U.S. Government restrictions on investments in issuers from certain foreign countries may result in a Fund having to sell such prohibited securities at inopportune times. Such prohibited securities may have less liquidity as a result of such U.S. Government designation and the market price of such prohibited securities may decline, which may cause the Fund to incur losses.

**Foreign Currency Risk** (*Global Policy Opportunities ETF and Macro Momentum ETF*) – As a result of a Fund's investments in securities or other investments denominated in, and/or receiving revenues in, foreign currencies, the Fund will be subject to currency risk. Currency risk is the risk that foreign currencies will decline in value relative to the U.S. dollar, in which case the dollar value of an investment in a Fund would be adversely affected. Currency exchange rates may fluctuate in response to, among other things, changes in interest rates, intervention (or failure to intervene) by U.S. or foreign governments, central banks or supranational entities, or by the imposition of currency controls or other political developments in the United States or abroad.

**Geographic Focus Risk** (*Global Policy Opportunities ETF*) – To the extent that it focuses its investments on a particular country or geographic region outside the U.S., the Fund may be more susceptible to economic, political, regulatory or other events or conditions affecting issuers and countries within that country or geographic region. As a result, the Fund may be subject to greater price volatility and risk of loss than a fund holding more geographically diverse investments.

**European Risk** – As of the date of this Prospectus, the Fund has significant exposure to securities of issuers located in the European region. As a result, the Fund is more exposed to the economic and political risks of Europe and of the European countries in which it invests. Any adverse economic or political events in Europe may cause the Fund's investments to decline in value. The economies and markets of European countries are often closely connected and interdependent, and events in one country in Europe can have an adverse impact on other European countries. Countries in Europe will be significantly affected by the fiscal and monetary controls of the EU. Changes in regulations on trade, decreasing imports or exports, changes in the exchange rate of the Euro, the default or threat of default by an EU member country on its sovereign debt, and recessions among European countries may have a significant adverse effect on the economies of other European countries. In addition, one or more countries may abandon the Euro and/or withdraw from the EU, such as the U.K.'s formal exit on January 31, 2020 (commonly referred to as "Brexit"). While the full impact of Brexit is

unknown, Brexit has already resulted in volatility in European and global markets. There remains significant market uncertainty regarding Brexit's ramifications, and the range and potential implications of possible political, regulatory, economic, and market outcomes are difficult to predict. There is also still considerable uncertainty whether the exit will increase the likelihood of other countries also departing the EU.

In addition, on February 24, 2022, Russian military forces invaded Ukraine, significantly amplifying already existing geopolitical tensions among Russia, Ukraine, Europe, NATO, and the West. Following Russia's actions, various countries, including the U.S., Canada, the UK, Germany, and France, as well as the EU, issued broad-ranging economic sanctions against Russia. The sanctions consist of the prohibition of trading in certain Russian securities and engaging in certain private transactions, the prohibition of doing business with certain Russian corporate entities, large financial institutions, officials and oligarchs, and the freezing of Russian assets. The extent and duration of the war in Ukraine and the longevity and severity of sanctions remain unknown, but they could have a significant adverse impact on the European economy as well as the price and availability of certain commodities, including oil and natural gas, throughout the world. These sanctions, and the resulting disruption of the Russian economy, may cause volatility in other regional and global markets and may negatively impact the performance of various sectors and industries, as well as companies in other countries, which could have a negative effect on the performance of the Fund, even if the Fund does not have direct exposure to securities of Russian issuers.

**Geopolitical Risk & Foreign Relations Risk** (*Global Policy Opportunities ETF*) – U.S. and international markets have experienced significant periods of volatility due to a number of economic, political and other global macro factors. As of the date of this Prospectus, the U.S. is involved in a number of negotiations with foreign entities over alleged mistreatment of U.S. companies, imbalances in trade, tariff rates, currency manipulation, and non-trade non-tariff barriers and activities. Whether these negotiations resolve positively or escalate, changes in the trade relationships between the U.S. and foreign countries could result in positive or negative ramifications for the Fund's holdings. Additionally, escalation or de-escalation in the geopolitical climate, new or resolved conflicts, and changes to the defense budgets of both the U.S. and foreign countries may impact performance of the Fund's holdings.

**Gold Risk** (*Macro Momentum ETF*) – Price movements in gold may fluctuate quickly and dramatically, have a historically low correlation with the returns of the stock and bond markets, and may not correlate to price movements

in other asset classes. Some factors that impact the price of gold include, but are not limited to, overall market movements, changes in interest rates, changes in the global supply and demand for gold, the quantity of gold imports and exports, factors that impact gold production, such as drought, floods and weather conditions, technological advances in the processing and mining of gold, and changes in economic and/or political conditions, including regulatory developments. A change in economic conditions, such as a recession or economic downturn, may adversely affect the price of precious metals, such as gold, and have a negative impact on the usage and demand for gold, which may result in a loss for the Fund. In addition, a sudden shift in political conditions of the world's leading gold producers may have a negative effect on the global pricing of gold. Further, an increase in the hedging of precious metals, such as gold, may also result in a decline in the price of gold. Each of these factors and events could have a significant negative impact on the Fund. None of these specific commodity factors can be controlled in managing the Fund. Even if current and correct information as to substantially all factors are known or thought to be known, prices still will not always react as predicted.

**Inflation Risk** (*All Funds*) – Inflation risk is the risk that the value of assets or income from investments will be less in the future as inflation decreases the value of money. As inflation increases, the value of a Fund's assets can decline. Measures of inflation have increased to levels not experienced in several decades. Uncertainty regarding the magnitude of interest rate increases, and the ability of the Federal Reserve to successfully control inflation, may negatively impact asset prices and increase market volatility.

**Investments in Investment Company Risk** (*Macro Momentum ETF*) – The Fund may purchase shares of investment companies. When the Fund invests in an investment company, it will bear a pro rata portion of the investment company's expenses in addition to directly bearing the expenses associated with its own operations. Such expenses may make owning shares of an investment company more costly than owning the underlying securities directly. In part because of these additional expenses, the performance of an investment company may differ from the performance the Fund would achieve if it invested directly in the underlying investments of the investment company. In addition, while the risks of owning shares of an investment company generally reflect the risks of owning the underlying investments of the investment company, the Fund may be subject to additional or different risks than if the Fund had invested directly in the underlying investments.

**Large Capitalization Risk** (*All Funds*) – If valuations of large capitalization companies appear to be greatly out of proportion to the valuations of small or medium capitalization companies, investors may migrate to the stocks of

small and medium-sized companies. Additionally, larger, more established companies may be unable to respond quickly to new competitive challenges such as changes in technology and consumer tastes. Larger companies also may not be able to attain the high growth rates of successful smaller companies.

**Liquidity Risk** (*All Funds*) – Liquidity risk exists when particular investments are difficult to purchase or sell. The market for certain investments may become illiquid due to specific adverse changes in the condition of a particular issuer or under adverse market or economic conditions independent of the issuer. A Fund's investments in illiquid securities may reduce the returns of the Fund because it may be unable to sell the illiquid securities at an advantageous time or price. Further, transactions in illiquid securities may entail transaction costs that are higher than those for transactions in liquid securities.

**Lobbying Focused Investments Risk** (*Global Policy Opportunities ETF*) – The Adviser's investment process utilizes lobbying intensity as the primary input when selecting securities for the Fund's portfolio. The Adviser does not consider a company's traditional financial metrics when constructing the Fund's portfolio. A company's financial performance is determined by a number of factors, and the degree to which a company engages in lobbying activities may have little or no impact on whether the company performs well or poorly financially. Further, a company may be lobbying due to a threat to its operations created by proposed or anticipated regulations and if such lobbying efforts are unsuccessful and the regulations are adopted, the regulations could lead to increased operational costs or other effects causing underperformance. Companies with significant lobbying expenditures may underperform companies with lower lobbying expenditures. The Fund may forego some market opportunities available to funds that do not focus on securities of companies with significant lobbying activity, and therefore the Fund may underperform such other funds. Additionally, U.S. federal law imposes obligations on companies to disclose certain information on lobbying spend. If the law were to change in a manner so as to limit or eliminate such disclosures, it could have a material, negative impact on the Adviser's ability to gather information regarding corporate lobbying spend.

**Macro Momentum Investing Strategy Risk** (*Macro Momentum ETF*) – The Adviser selects securities for the Fund's portfolio pursuant to a macro momentum investment strategy. The value of the Fund may decline if, among other reasons, macro momentum strategy believed to be beneficial to the Fund does not develop as anticipated or maintain over time, securities selected for inclusion in the Fund's portfolio due to their security characteristics that the Adviser believes are most highly correlated to a

macro momentum strategy do not perform as anticipated, the Adviser fails to identify or declines to include in the Fund's portfolio profitable companies that would have been beneficial to a macro momentum portfolio, or other investment strategies generally outperform a macro momentum strategy of investing based on a variety of factors.

**Macro-Thematic Trend Investing Strategy Risk** (*Macro Thematic Opportunities ETF*) – The Adviser selects securities for the Fund's portfolio pursuant to a macro-thematic trend investment strategy. The value of the Fund may decline if, among other reasons, macro-thematic trends believed to be beneficial to the Fund do not develop as anticipated or maintain over time, securities selected for inclusion in the Fund's portfolio due to their security characteristics that the Adviser believes are most highly correlated to a macro-thematic trend do not perform as anticipated, the Adviser fails to identify or declines to include in the Fund's portfolio profitable companies that would have been beneficial to a macro-thematic trend, or other investment strategies generally outperform macro-thematic trends investing based on a variety of factors.

**Master Limited Partnerships (MLPs) Risk** (*Macro Momentum ETF*) – MLPs are limited partnerships in which the ownership units are publicly traded. MLPs often own several properties or businesses (or own interests) that are related to oil and gas industries or other natural resources, but they also may finance other projects. To the extent that an MLP's interests are all in a particular industry, the MLP will be negatively impacted by economic events adversely impacting that industry. Additional risks of investing in a MLP also include those involved in investing in a partnership as opposed to a corporation, such as limited control of management, limited voting rights and tax risks. MLPs may be subject to state taxation in certain jurisdictions, which will have the effect of reducing the amount of income paid by the MLP to its investors.

**Methodology Risk** (*Global Policy Opportunities ETF*) – The Adviser's methodology to determine a company's "lobbying intensity" is derived from publicly available lobbying data filed and disclosed pursuant to the LDA. To the extent that a company fraudulently or accidentally reports incorrect lobbying expenditures, such data may affect the Adviser's methodology and cause securities of a company to be included in or excluded from the Fund's portfolio when such securities otherwise would have been excluded or included, respectively. Further, there may be ways to influence legislation or public policy that may not be legally classified as "lobbying" or reported as such pursuant to the LDA. Additionally, the LDA only covers U.S. federal lobbying and does not include state or local lobbying or the lobbying of foreign governments. To the extent that the data disclosed pursuant to

the LDA does not fully capture all lobbying expenditures or is otherwise incomplete, the Adviser's methodology may be affected and result in securities of companies being included or excluded in the portfolio of the Fund that otherwise may have been excluded or included, respectively. The exclusion or inclusion of such securities may negatively affect the value of the Fund's portfolio.

**New Fund Risk** (*Macro Momentum ETF*) – Because the Fund is new, investors in the Fund bear the risk that the Fund may not be successful in implementing its investment strategy, may not employ a successful investment strategy, or may fail to attract sufficient assets under management to realize economies of scale, any of which could result in the Fund being liquidated at any time without shareholder approval and at a time that may not be favorable for all shareholders. Such liquidation could have negative tax consequences for shareholders and will cause shareholders to incur expenses of liquidation.

**Portfolio Turnover Risk** (*All Funds*) – Due to its investment strategy, a Fund may buy and sell securities frequently. This may result in higher transaction costs and additional capital gains tax liabilities, which may affect a Fund's performance.

**REITs Risk** (*Macro Momentum ETF*) – REITs are trusts that invest primarily in commercial real estate or real estate-related loans. By investing in REITs indirectly through the Fund, shareholders will not only bear the proportionate share of the expenses of the Fund, but will also, indirectly, bear the expenses of the REITs. The Fund may be subject to certain risks associated with the direct investments of the REITs. REITs may be affected by changes in the value of their underlying properties and by defaults by borrowers or tenants.

Some REITs may have limited diversification and may be subject to risks inherent in financing a limited number of properties. REITs depend generally on their ability to generate cash flow to make distributions to shareholders or unitholders, and may be subject to defaults by borrowers and to self-liquidations. In addition, a U.S. REIT may be affected by its failure to qualify for tax-free pass-through of income under the Code, or its failure to maintain exemption from registration under the Investment Company Act of 1940, as amended (the "1940 Act").

**Sector Focus Risk** (*All Funds*) – Because the Funds may, from time to time, be more heavily invested in particular sectors, the value of their shares may be especially sensitive to factors and economic risks that specifically affect those sectors. As a result, each Fund's share price may fluctuate more widely than the value of shares of a fund that invests in a broader

range of sectors. The Funds' sector exposures may change over time, as macroeconomic, market, sector and company-specific conditions change.

**Industrials Sector Risk** (*Global Policy Opportunities ETF*) – As of the date of this Prospectus, the Fund has significant exposure to securities of issuers in the industrials sector. The Fund is subject to the risk that the securities of issuers in the industrials sector will underperform the market as a whole due to legislative or regulatory changes, adverse market conditions and/or increased competition affecting the industrials sector. The prices of the securities of companies operating in the industrials sector may fluctuate due to the level and volatility of commodity prices, the exchange value of the dollar, import controls, worldwide competition, tariffs and trade barriers, liability for environmental damage, depletion of resources, and mandated expenditures for safety and pollution control devices.

**Healthcare Sector Risk** (*Global Policy Opportunities ETF*) – As of the date of this Prospectus, the Fund has significant exposure to securities of issuers in the healthcare sector. Companies in the healthcare sector are subject to extensive government regulation and their profitability can be significantly affected by restrictions on government reimbursement for medical expenses, rising costs of medical products and services, pricing pressure (including price discounting), limited product lines, tariffs and trade barriers, and an increased emphasis on the delivery of healthcare through outpatient services. Companies in the healthcare sector can also be significantly affected by product liability claims, rapid obsolescence of products or services, and patent expirations, as well as government approval of products and services.

**Materials Sector Risk** (*Global Policy Opportunities ETF*) – As of the date of this Prospectus, the Fund has significant exposure to securities of issuers in the materials sector. The materials sector includes companies that manufacture chemicals, construction materials, glass, paper, forest products and related packaging products, and metals, minerals and mining companies, including producers of steel. The Fund is subject to the risk that the securities of such issuers will underperform the market as a whole due to legislative or regulatory changes, adverse market conditions and/or increased competition affecting the materials sector. The prices of the securities of companies operating in the materials sector may fluctuate widely due to the level and volatility of commodity prices, the exchange value of the U.S. dollar, tariffs and trade barriers, supply chain disruptions, import controls, worldwide competition, liability for environmental damage, depletion of resources, and mandated expenditures for safety and pollution control devices.

**Consumer Discretionary Sector Risk** (*Global Policy Opportunities ETF*) – As of the date of this Prospectus, the Fund has significant exposure to securities of issuers in the consumer discretionary sector. The manufacturing segment of the consumer discretionary sector includes automotive, household durable goods, leisure equipment and textiles and apparel. The services segment includes hotels, restaurants and other leisure facilities, media production and services, and consumer retailing and services. The Fund is subject to the risk that the securities of such issuers will underperform the market as a whole due to legislative or regulatory changes, adverse market conditions and/or increased competition affecting the consumer discretionary sector. Many companies in the manufacturing segment rely on foreign nations for sourcing of raw materials and/or final goods. Changes in tariff rates imposed by the US, or addition of new trade barriers, could create additional costs or uncertainty. Additionally, US imposition of tariffs could create retaliatory actions abroad which negatively impact multinational companies' non-US customer basis. The performance of companies operating in the consumer discretionary sector has historically been closely tied to the performance of the overall economy, and also is affected by economic growth, consumer confidence, tax cuts or hikes on individuals, attitudes and spending. Changes in demographics and consumer tastes also can affect the demand for, and success of, consumer products and services in the marketplace. Moreover, the consumer discretionary sector encompasses those businesses that tend to be the most sensitive to economic cycles.

**Information Technology Sector Risk** (*Global Policy Opportunities ETF*) – As of the date of this Prospectus, the Fund has significant exposure to securities of issuers in the information technology sector. The information technology sector has been among the most volatile sectors of the stock market. Because the Fund's investments are significantly exposed to companies in the information technology sector, its performance will be significantly affected by developments in that sector. The information technology sector includes companies that offer software and information technology services, manufacturers and distributors of technology hardware and equipment such as communications equipment, cellular phones, computers and peripherals, electronic equipment and related instruments and semiconductors. Companies in the information technology sector involve greater risk because their revenue and/or earnings tend to be less predictable (and some companies may be experiencing significant losses) and their share prices tend to be more volatile. Certain companies in the information technology sector may have limited product lines, markets

or financial resources, or may depend on a limited management group. Companies within the information technology sector may rely on foreign countries for sourcing of components or materials for products, as well as manufacture of finished goods. As such, changes in trade relationships between the U.S. and foreign countries may impact these companies in the form of higher costs, reduced market access, and higher uncertainty. In addition, these companies are strongly affected by worldwide technological developments, and their products and services may not be economically successful or may quickly become outdated. Investor perception may play a greater role in determining the day-to-day value of information technology stocks than it does in other sectors. Fund investments may decline dramatically in value if anticipated products or services are delayed or cancelled. The risks associated with companies in the information technology sector are magnified in the case of small-cap technology companies.

**Communication Services Sector Risk** (*Global Policy Opportunities ETF*) – As of the date of this Prospectus, the Fund has significant exposure to securities of issuers in the communication services sector. The Fund is subject to the risk that the securities of issuers in the communication services sector will underperform the market as a whole due to legislative or regulatory changes, adverse market conditions and/or increased competition affecting the communication services sector. The communication services sector may be dominated by a small number of companies which may lead to additional volatility in the sector. Communication services companies are particularly vulnerable to the potential obsolescence of products and services due to technological advances and the innovation of competitors. Communication services companies may also be affected by other competitive pressures, such as pricing competition, as well as research and development costs, substantial capital requirements, and government regulation. Fluctuating domestic and international demand, shifting demographics, and often unpredictable changes in consumer demand can drastically affect a communication services company's profitability. Compliance with governmental regulations, delays or failure to receive regulatory approvals, or the enactment of new regulatory requirements may negatively affect the business of communication services companies. Certain companies in the communication services sector may be particular targets of network security breaches, hacking and potential theft of proprietary or consumer information, or disruptions in services, which would have a material adverse effect on their businesses.

**Shareholder Concentration Risk** (*All Funds*) – A large percentage of each Fund's shares are held by a small number of shareholders, including

persons and entities related to the Adviser. A large redemption by one or more of these shareholders could materially increase a Fund's transaction costs, which would negatively impact the Fund's performance and could cause adverse tax consequences for the remaining shareholders of the Fund.

**Small and Medium Capitalization Companies Risk** (*All Funds*) –

Investing in equity securities of small and medium capitalization companies often involves greater risk than is customarily associated with investments in larger capitalization companies. This increased risk may be due to the greater business risks of smaller size companies, limited markets and financial resources, narrow product lines and the frequent lack of depth of management. Stock prices of smaller companies may be based in substantial part on future expectations rather than current achievements. The securities of smaller companies are often traded over-the-counter and, even if listed on a national securities exchange, may not be traded in volumes typical for that exchange. Consequently, the securities of smaller companies may be less liquid, may have limited market stability and may be subject to more severe, abrupt or erratic market movements than securities of larger, more established companies or the market averages in general. Further, smaller companies may have less publicly available information and, when available, it may be inaccurate or incomplete.

**Tax Risk** (*Macro Momentum ETF*) – Income from certain ETPs that invest in commodities and other non-security based asset classes, as well as direct investments in such alternative asset classes, may not be considered qualifying income for purposes of the qualifying income test that must be met by the Fund in order to qualify as a RIC under Subchapter M of the Code. The Fund will seek to restrict its income from direct investments in such alternative investments that do not generate qualifying income to a maximum of 10% of its gross income (when combined with its other investments that produce non-qualifying income) to comply with certain qualifying income tests necessary for the Fund to qualify as a RIC under the Code. However, there is no guarantee that the Fund will be successful in this regard. If the Fund fails to qualify as a RIC and to avail itself of certain relief provisions, it would be subject to tax at the regular corporate rate without any deduction for distributions to shareholders, and its distributions would generally be taxable as dividends. Please see the Fund's SAI for a more detailed discussion, including the availability of certain relief provisions for certain failures by the Fund to qualify as a RIC. The tax treatment of certain commodity investments and other non-security based instruments may be affected by future regulatory or legislative changes that could affect the character, timing and/or amount of the Fund's taxable income or gains and distributions. The Fund's pursuit of its investment objective will potentially

be limited by the Fund's intention to qualify for treatment as a RIC. The Fund can make certain investments, the treatment of which is unclear under the Code and could adversely affect the Fund's ability to qualify as a RIC.

**U.S. Fiscal Risk** (*Global Policy Opportunities ETF*) – As of the date of this Prospectus, the U.S. federal government is running fiscal deficits as a percentage of GDP above historical averages. The U.S.' debt to GDP ratio is also elevated. Efforts by the administration to improve the U.S.' fiscal state via reducing spending or increasing revenue could impact certain holdings of the Fund as well as the overall economy of the U.S. Additionally, failure for the U.S. to improve its fiscal state or take necessary actions such as raising the federal debt ceiling could result in U.S. debt being downgraded, which could have follow-on ramifications for the U.S. economy and investing environment. Certain companies held by the Fund rely on the U.S. as a customer and may be negatively impacted by any reductions in available spending or failure by the U.S. to pay its contractors and vendors for their services.

**U.S. Government Securities Risk** (*Macro Momentum ETF*) – Although U.S. Government securities are considered to be among the safest investments, they are not guaranteed against price movements due to changing interest rates. Obligations issued by some U.S. Government agencies are backed by the U.S. Treasury, while others are backed solely by the ability of the agency to borrow from the U.S. Treasury or by the agency's own resources. Therefore, such obligations are not backed by the full faith and credit of the U.S. Government.

**Valuation Risk** (*All Funds*) – The risk that a security may be difficult to value. A Fund may value certain securities at a price higher than the price at which they can be sold. This risk may be especially pronounced for investments that are illiquid or may become illiquid.

## **Information about Portfolio Holdings**

---

A description of the Funds' policies and procedures with respect to the circumstances under which the Funds disclose their portfolio holdings is available in the SAI.

## **Investment Adviser**

---

Strategas Asset Management, LLC, a New York state limited liability company formed in 2014 and registered with the SEC since 2018, serves as the investment adviser to the Funds. The Adviser's principal place of business is 52 Vanderbilt Ave, 19th Floor, New York, NY 10017. The Adviser is owned directly by Baird Financial Corporation ("BFC"). BFC is, in turn,

owned by Baird Financial Group, Inc. (“BFG”), which is the ultimate parent company of BFC. Substantially all of the outstanding voting stock of BFG is employee-owned. As of February 28, 2025, the Adviser had approximately \$182.4 million in assets under management and an additional \$122.9 million in assets under advisement.

The Adviser oversees the day-to-day operations of the Funds, subject to the oversight of the Board. The Adviser also arranges for sub-advisory, transfer agency, custody, fund administration, distribution and all other services necessary for the Funds to operate. Further, the Adviser continuously reviews, supervises, and administers the Funds’ investment program. In particular, the Adviser provides investment and operational oversight of the Sub-Adviser. The Board oversees the Adviser and establishes policies that the Adviser must follow in its day-to-day management activities.

For its services to each Fund, the Adviser is entitled to a fee, which is calculated daily and paid monthly, at the annual rates set forth below based on the average daily net assets of each Fund. The Adviser, in turn, compensates the Sub-Adviser from the management fees it receives.

<b>Fund</b>	<b>Advisory Fee Rate</b>
Global Policy Opportunities ETF	0.65%
Macro Thematic Opportunities ETF	0.65%
Macro Momentum ETF	0.55%

With respect to the Global Policy Opportunities ETF and Macro Thematic Opportunities ETF, the Adviser has agreed to pay all expenses incurred by each Fund except for the advisory fee, interest, taxes, brokerage commissions and other expenses incurred in placing orders for the purchase and sale of securities and other investment instruments, acquired fund fees and expenses, accrued deferred tax liability, extraordinary expenses, and distribution fees and expenses paid by each Fund under any distribution plan adopted pursuant to Rule 12b-1 under the 1940 Act.

With respect to the Macro Momentum ETF, the Adviser has contractually agreed to waive fees and/or to reimburse expenses to the extent necessary to keep total annual operating expenses of the Fund (excluding any interest, taxes, brokerage commissions and other costs and expenses relating to the securities that are purchased and sold by the Fund, dividend and interest expenses on securities sold short, AFFE, fees and expenses incurred in connection with tax reclaim recovery services, other expenditures which are capitalized in accordance with generally accepted accounting principles, and non-routine expenses) (collectively, “excluded expenses”) from exceeding 0.65% of the average daily net assets of the Fund until April 30, 2026 (the “contractual expense limit”). In addition, the Adviser

may receive from the Macro Momentum ETF the difference between the Total Annual Fund Operating Expenses (not including excluded expenses) and the contractual expense limit to recoup all or a portion of its prior fee waivers or expense reimbursements made during the rolling three-year period preceding the date of the recoupment if at any point Total Annual Fund Operating Expenses (not including excluded expenses) are below the contractual expense limit (i) at the time of the fee waiver and/or expense reimbursement and (ii) at the time of the recoupment. The agreement may be terminated: (i) by the Board, for any reason at any time; or (ii) by the Adviser, upon ninety (90) days' prior written notice to the Trust, effective as of the close of business on April 30, 2026.

For the fiscal year ended December 31, 2024, the Adviser received advisory fees, stated as a percentage of the average daily net assets of each Fund, as follows:

<b>Fund</b>	<b>Advisory Fees Paid</b>
Global Policy Opportunities ETF	0.65%
Macro Thematic Opportunities ETF	0.65%
Macro Momentum ETF	0.00% <sup>1</sup>

<sup>1</sup> Reflects the period from April 3, 2024 (commencement of Fund operations) to December 31, 2024.

A discussion regarding the basis for the Board's approval of the investment advisory agreement for the Global Policy Opportunities ETF and Macro Thematic Opportunities ETF is available in the Funds' reports filed on Form N-CSR for the fiscal year ended December 31, 2024. A discussion regarding the basis for the Board's approval of the investment advisory agreement for the Macro Momentum ETF is available in the Funds' reports filed on Form N-CSRS for the fiscal period ended June 30, 2024.

## **Investment Sub-Adviser**

Vident Asset Management, a Delaware limited liability company formed in 2016 and registered with the SEC in 2019 and located at 1125 Sanctuary Pkwy., Suite 515, Alpharetta, Georgia 30009, serves as the sub-adviser to the Funds. As of February 28, 2025, the Sub-Adviser had approximately \$13.2 billion under management.

The Sub-Adviser is responsible for trading portfolio securities for the Funds, including selecting broker-dealers to execute purchase and sale transactions or in connection with any rebalancing or reconstitution of the portfolio, pre- and post-trade compliance, and monitoring of Fund trading activity, subject to the oversight of the Adviser and the Board.

For its services, the Sub-Adviser is entitled to a fee from the Adviser, which fee is calculated daily and paid monthly, at an annual rate of 0.07% based on the average daily net assets of the Funds for assets up to \$250 million, 0.065% for assets exceeding \$250 million, and 0.06% for assets exceeding \$500 million, subject to an annual, per Fund minimum of \$35,000.

A discussion regarding the basis for the Board's approval of the investment sub-advisory agreement for the Global Policy Opportunities ETF and Macro Thematic Opportunities ETF is available in the Funds' reports filed on Form N-CSR for the fiscal year ended December 31, 2024. A discussion regarding the basis for the Board's approval of the investment sub-advisory agreement for the Macro Momentum ETF is available in the Funds' reports filed on Form N-CSRS for the fiscal period ended June 30, 2024.

## Portfolio Managers

---

### Strategas Asset Management, LLC

Dan Clifton and Courtney Rosenberger Gelman are the lead portfolio managers of the Global Policy Opportunities ETF, with Nicholas Bohnsack and Gerald Hendricks serving as co-portfolio managers. Jason Trennert and Nicholas Bohnsack are the lead portfolio managers of the Macro Thematic Opportunities ETF, with Ryan Grabinski and Gerald Hendricks being co-portfolio managers. Chris Verrone and Nicholas Bohnsack are the lead portfolio managers of the Macro Momentum ETF, with Todd Sohn and Gerald Hendricks being co-portfolio managers. Each lead portfolio manager and co-portfolio manager has been a lead portfolio manager or co-portfolio manager, respectively, since the applicable Fund's inception. Each lead portfolio manager and co-portfolio manager is jointly and primarily responsible for overseeing day-to-day operations of such Funds' portfolios.

**Dan Clifton:** Portfolio Manager at Strategas Asset Management, LLC since 2016 and Head of Policy Research at Strategas Securities, LLC since 2007.

**Nicholas Bohnsack:** President and Chief Executive Officer of Strategas Asset Management, LLC since 2014 and President & Chief Operating Officer of Strategas Securities, LLC since 2006.

**Ryan Grabinski:** Managing Director of Strategas Asset Management, LLC since 2014 and Managing Director of Strategas Securities, LLC from 2013.

**Gerald Hendricks:** Director and Senior Portfolio Analyst of Strategas Asset Management, LLC since January 2021. Financial Advisor at Merrill Lynch Wealth Management from 2019-2021. Macro and Technical Strategist at Aker Capital in 2018. Senior Analyst, Portfolio and Technical Analytics at

Columbus Circle Investors from 2007-2017. Technical Market Strategist at Lehman Brothers from 2000-2007.

**Courtney Rosenberger Gelman:** Analyst at Strategas Asset Management, LLC since 2016 and Managing Director at Strategas Securities, LLC since 2021. Ms. Rosenberger Gelman has been employed at Strategas Securities, LLC since 2014.

**Jason Trennert:** Chairman of Strategas Asset Management, LLC since 2014 and Chairman & Chief Executive Officer of Strategas Securities, LLC since 2006.

**Chris Verrone:** Partner and Head of Technical & Macro Research at Strategas Securities, LLC since 2007.

**Todd Sohn:** Managing Director of Technical & ETF Research at Strategas Securities, LLC since 2013.

## **Vident Asset Management**

Rafael Zayas, CFA and Austin Wen, CFA are portfolio managers of the Funds. Each portfolio manager has been a portfolio manager since the applicable Fund's inception.

**Rafael Zayas:** Senior Vice President, Head of Portfolio Management and Trading at Vident Asset Management since June 2020. From 2017 to 2020, Senior Portfolio Manager – International Equity. Prior to joining the Sub-Adviser, he was a Portfolio Manager – Direct Investments for seven years at Russell Investments, a global asset manager.

**Austin Wen:** Senior Portfolio Manager at Vident Asset Management, specializing in portfolio management and trading of equity, derivative, and commodities-based portfolios, as well as risk monitoring and investment analysis. Previously, he was an analyst for Vident Financial, LLC, focusing on the development and review of various investment solutions and prior to that a State Examiner for the Georgia Department of Banking and Finance.

The SAI provides additional information about the portfolio managers' compensation, other accounts managed, and ownership of Fund shares.

## **Purchasing and Selling Fund Shares**

---

The Funds issue shares to (or redeem shares from) certain institutional investors known as "Authorized Participants" (typically market makers or other broker-dealers) only in large blocks of at least 10,000 shares known as "Creation Units." Creation Unit transactions are conducted in exchange for the deposit or delivery of a portfolio of in-kind securities designated by the Funds and/or cash.

Shares of each Fund are listed for trading on the Exchange. When you buy or sell a Fund's shares on the secondary market, you will pay or receive the market price. You may incur customary brokerage commissions and charges and may pay some or all of the spread between the bid and the offered price in the secondary market on each leg of a round trip (purchase and sale) transaction. The shares of each Fund will trade on the Exchange at prices that may differ to varying degrees from the daily NAV of such shares. A business day with respect to the Funds is any day on which the Exchange is open for business. The Exchange is generally open Monday through Friday and is closed on weekends and the following holidays: New Year's Day, Martin Luther King, Jr. Day, Presidents' Day, Good Friday, Memorial Day, Juneteenth National Independence Day, Independence Day, Labor Day, Thanksgiving Day and Christmas Day.

Each Fund's NAV is determined by dividing the total value of the Fund's portfolio investments and other assets, less any liabilities, by the total number of shares outstanding. NAV is determined each business day, normally as of the close of regular trading of the Exchange (ordinarily 4:00 p.m., Eastern time).

In calculating NAV, each Fund generally values its investment portfolio at market price. If market prices are not readily available or they are unreliable, such as in the case of a security value that has been materially affected by events occurring after the relevant market closes, securities are valued at fair value. The Board has designated the Adviser as the Funds' valuation designee to make all fair value determinations with respect to the Funds' portfolio investments, subject to the Board's oversight. The Adviser has adopted and implemented policies and procedures to be followed when making fair value determinations, and it has established a Valuation Committee through which the Adviser makes fair value determinations. The Adviser's determination of a security's fair value price often involves the consideration of a number of subjective factors, and is therefore subject to the unavoidable risk that the value that is assigned to a security may be higher or lower than the security's value would be if a reliable market quotation for the security was readily available.

With respect to non-U.S. securities held by a Fund, the Adviser may take factors influencing specific markets or issuers into consideration in determining the fair value of a non-U.S. security. Foreign securities markets may be open on days when the U.S. markets are closed. In such cases, the value of any foreign securities owned by a Fund may be significantly affected on days when investors cannot buy or sell shares. In addition, due to the difference in times between the close of the foreign markets and the time as of which a Fund prices its shares, the value the Adviser assigns to

securities may not be the same as the quoted or published prices of those securities on their primary markets or exchanges. In determining fair value prices, the Adviser may consider the performance of securities on their primary exchanges, foreign currency appreciation/depreciation, securities market movements in the United States, or other relevant information related to the securities.

There may be limited circumstances in which the Adviser would price securities at fair value for stocks of U.S. companies that are traded on U.S. exchanges – for example, if the exchange on which a portfolio security is principally traded closed early or if trading in a particular security was halted during the day and did not resume prior to the time a Fund calculated its NAV. Fair value pricing involves subjective judgments and it is possible that a fair value determination for a security will materially differ from the value that could be realized upon the sale of the security.

## **Payments to Financial Intermediaries**

---

The Funds and/or the Adviser may compensate financial intermediaries for providing a variety of services to the Funds and/or their shareholders. Financial intermediaries include affiliated or unaffiliated brokers, dealers, banks (including bank trust departments), trust companies, registered investment advisers, financial planners, retirement plan administrators, insurance companies, and any other institution having a service, administration, or any similar arrangement with the Funds, their service providers or their respective affiliates. This section briefly describes how financial intermediaries may be paid for providing these services. For more information, please see “Payments to Financial Intermediaries” in the SAI.

## **Distribution Plan**

The Funds have adopted a distribution plan pursuant to Rule 12b-1 under the 1940 Act that allows the Funds to pay distribution and/or service fees for the sale and distribution of Fund shares, and for services provided to shareholders. No Rule 12b-1 fees are currently paid by the Funds, and there are no plans to impose these fees. However, in the event Rule 12b-1 fees are charged in the future, because these fees are paid out of a Fund's assets on an on-going basis, over time these fees will increase the cost of your investment and may cost you more than paying other types of sales charges. The maximum annual Rule 12b-1 fee is 0.25% of the average daily net assets of a Fund.

The implementation of any payments under the distribution plan must be approved by the Board prior to implementation.

## **Payments by the Adviser**

From time to time, the Adviser and/or its affiliates, in their discretion, may make payments to certain affiliated or unaffiliated financial intermediaries to compensate them for the costs associated with distribution, marketing, administration and shareholder servicing support for the Funds. These payments are sometimes characterized as “revenue sharing” payments and are made out of the Adviser’s and/or its affiliates’ own legitimate profits or other resources and may be in addition to any payments that the Funds make to financial intermediaries. A financial intermediary may provide these services with respect to Fund shares sold or held through programs such as retirement plans, qualified tuition programs, fund supermarkets, fee-based advisory or wrap fee programs, bank trust programs, and insurance (e.g., individual or group annuity) programs. In addition, financial intermediaries may receive payments for making shares of the Funds available to their customers or registered representatives, including providing the Funds with “shelf space,” placing them on a preferred or recommended fund list, or promoting the Funds in certain sales programs that are sponsored by financial intermediaries. To the extent permitted by SEC and Financial Industry Regulatory Authority (“FINRA”) rules and other applicable laws and regulations, the Adviser and/or its affiliates may pay or allow other promotional incentives or payments to financial intermediaries.

The level of payments made by the Adviser and/or its affiliates to individual financial intermediaries varies in any given year and may be negotiated on the basis of sales of Fund shares, the amount of Fund assets serviced by the financial intermediary or the quality of the financial intermediary’s relationship with the Adviser and/or its affiliates. These payments may be more or less than the payments received by the financial intermediaries from other funds and may influence a financial intermediary to favor the sales of certain funds or share classes over others. In certain instances, the payments could be significant and may cause a conflict of interest for your financial intermediary. Any such payments will not change the NAV or price of a Fund’s shares. Please contact your financial intermediary for information about any payments it may receive in connection with the sale of Fund shares or the provision of services to Fund shareholders.

In addition to these payments, your financial intermediary may charge you account fees, commissions or transaction fees for buying or redeeming shares of a Fund, or other fees for servicing your account. Your financial intermediary should provide a schedule of its fees and services to you upon request.

## **Other Policies**

---

### **Excessive Trading Policies and Procedures**

The Funds do not impose any restrictions on the frequency of purchases and redemptions of Creation Units; however, each Fund reserves the right to reject or limit purchases at any time as described in the SAI. When considering that no restriction or policy was necessary, the Board evaluated the risks posed by arbitrage and market timing activities, such as whether frequent purchases and redemptions would interfere with the efficient implementation of a Fund's investment strategy, or whether they would cause the Fund to experience increased transaction costs. The Board considered that, unlike traditional mutual funds, shares of the Funds are issued and redeemed only in large quantities of shares known as Creation Units available only from a Fund directly to Authorized Participants, and that most trading in the Funds occurs on the Exchange at prevailing market prices and does not involve the Funds directly. Given this structure, the Board determined that it is unlikely that trading due to arbitrage opportunities or market timing by shareholders would result in negative impact to the Funds or their shareholders. In addition, frequent trading of a Fund's shares by Authorized Participants and arbitrageurs is critical to ensuring that the market price remains at or close to NAV.

## **Dividends, Distributions and Taxes**

---

### **Fund Distributions**

Each Fund distributes its net investment income, if any, and makes distributions of its net realized capital gains, if any, at least annually. If you own shares of a Fund on the Fund's record date, you will be entitled to receive the distribution.

### **Dividend Reinvestment Service**

Brokers may make available to their customers who own shares of a Fund the Depository Trust Company book-entry dividend reinvestment service. If this service is available and used, dividend distributions of both income and capital gains will automatically be reinvested in additional whole shares of a Fund purchased on the secondary market. Without this service, investors would receive their distributions in cash. To determine whether the dividend reinvestment service is available and whether there is a commission or other charge for using this service, consult your broker. Brokers may require a Fund's shareholders to adhere to specific procedures and timetables.

## **Tax Information**

The following is a summary of certain important U.S. federal income tax issues that affect the Funds and their shareholders. The summary is based on current tax laws, which may be changed by legislative, judicial or administrative action. You should not consider this summary to be a comprehensive explanation of the tax treatment of the Funds, or the tax consequences of an investment in a Fund. Your investment in a Fund may have other tax implications. More information about taxes is located in the SAI.

**You are urged to consult your tax adviser regarding specific questions as to federal, state and local income taxes.**

## **Tax Status of the Funds**

Each Fund has elected (or intends to elect) and to qualify each year for the special tax treatment afforded to regulated investment companies ("RICs") under Subchapter M of the Internal Revenue Code of 1986, as amended (the "Code"). If each Fund maintains its qualification as a RIC and meets certain minimum distribution requirements, then the Fund is generally not subject to tax at the fund level on income and gains from investments that are timely distributed to shareholders. However, if a Fund fails to qualify as a RIC or to meet minimum distribution requirements it would result (if certain relief provisions are not available) in fund-level taxation and consequently a reduction in income available for distribution to shareholders.

Unless you are a tax-exempt entity or your investment in Fund shares is made through a tax-deferred retirement account, such as an IRA, you need to be aware of the possible tax consequences when a Fund makes distributions, you sell Fund shares, and you purchase or redeem Creation Units (Authorized Participants only).

## **Tax Status of Distributions**

- The Funds intend to distribute, at least annually, substantially all of their net investment income and net capital gains income.
- Dividends and distributions are generally taxable to you whether you receive them in cash or reinvest them in additional shares.
- The income dividends you receive from a Fund may be taxed as either ordinary income or "qualified dividend income." Dividends that are reported by a Fund as qualified dividend income are generally taxable to non-corporate shareholders at a maximum tax rate currently set at 20% (lower rates apply to individuals in lower tax brackets). Qualified dividend income generally is income derived from dividends paid to a Fund by U.S. corporations or certain foreign corporations that are either incorporated in

a U.S. possession or eligible for tax benefits under certain U.S. income tax treaties. In addition, dividends that a Fund receives in respect of stock of certain foreign corporations may be qualified dividend income if that stock is readily tradable on an established U.S. securities market. For such dividends to be taxed as qualified dividend income to a non-corporate shareholder, a Fund must satisfy certain holding period requirements with respect to the underlying stock and the non-corporate shareholder must satisfy holding period requirements with respect to his or her ownership of the Fund's shares. Holding periods may be suspended for these purposes for stock that is hedged. Distributions that a Fund receives from an underlying fund taxable as a RIC will be treated as qualified dividend income only to the extent so reported by such ETF or underlying fund. Certain of the Global Policy Opportunities ETF's and Macro Momentum ETF's investment strategies may limit its ability to distribute dividends eligible for treatment as qualified dividend income.

- Taxes on distributions of capital gains (if any) are determined by how long a Fund owned the investments that generated them, rather than how long a shareholder has owned its shares. Sales of assets held by a Fund for more than one year generally result in long-term capital gains and losses, and sales of assets held by the Fund for one year or less generally result in short-term capital gains and losses. Distributions from a Fund's net capital gain (the excess of the Fund's net long-term capital gains over its net short-term capital losses) are taxable as long-term capital gains regardless of how long you have owned your shares. For non-corporate shareholders, long-term capital gains are generally taxable at a maximum tax rate currently set at 20% (lower rates apply to individuals in lower tax brackets). Distributions from a Fund's short-term capital gains are generally taxable as ordinary income.
- Corporate shareholders may be entitled to a dividends-received deduction for the portion of dividends they receive from a Fund that are attributable to dividends received by the Fund from U.S. corporations, subject to certain limitations. Certain of the Global Policy Opportunities ETF's and Macro Momentum ETF's investment strategies will limit its ability to distribute dividends eligible for the dividends-received deduction for corporate shareholders.
- In general, your distributions are subject to federal income tax for the year in which they are paid. However, distributions paid in January but declared by a Fund to shareholders of record in October, November or December of the previous year will be treated as having been received by shareholders on December 31 of the calendar year in which declared, and thus may be taxable to you in the previous year.

- You should note that if you purchase shares just before a distribution, the purchase price would reflect the amount of the upcoming distribution. In this case, you would be taxed on the entire amount of the distribution received, even though, as an economic matter, the distribution simply constitutes a return of your investment. This is known as “buying a dividend” and should generally be avoided by taxable investors.
- A Fund (or your broker) will inform you of the amount and character of any distributions shortly after the close of each calendar year.

## **Tax Status of Share Transactions**

Each sale of Fund shares or redemption of Creation Units will generally be a taxable event. Assuming a shareholder holds Fund shares as a capital asset, any capital gain or loss realized upon a sale of Fund shares is generally treated as a long-term gain or loss if the shares have been held for more than twelve months. Any capital gain or loss realized upon a sale of Fund shares held for twelve months or less is generally treated as short-term capital gain or loss. Any capital loss on the sale of shares held for six months or less is treated as long-term capital loss to the extent distributions of long-term capital gain were paid (or treated as paid) with respect to such shares. Any loss realized on a sale will be disallowed to the extent shares of a Fund are acquired, including through reinvestment of dividends, within a 61-day period beginning 30 days before and ending 30 days after the disposition of shares. The ability to deduct capital losses may be limited.

The cost basis of shares of a Fund acquired by purchase will generally be based on the amount paid for the shares and then may be subsequently adjusted for other applicable transactions as required by the Code. The difference between the selling price and the cost basis of shares generally determines the amount of the capital gain or loss realized on the sale or exchange of shares. Contact the broker through whom you purchased your shares to obtain information with respect to the available cost basis reporting methods and elections for your account.

An Authorized Participant who exchanges securities for Creation Units generally will recognize gain or loss from the exchange. The gain or loss will be equal to the difference between: (i) the market value of the Creation Units at the time of the exchange plus any cash received in the exchange, and (ii) the Authorized Participant's aggregate basis in the securities surrendered plus any cash paid for the Creation Units. An Authorized Participant who exchanges Creation Units for securities will generally recognize a gain or loss equal to the difference between: (i) the Authorized Participant's basis in the Creation Units, and (ii) the aggregate market value of the securities and the amount of cash received. The Internal Revenue Service (“IRS”), however, may assert that a loss that is realized upon

an exchange of securities for Creation Units may not be currently deducted under the rules governing “wash sales” (for a person who does not mark-to-market their holdings), or on the basis that there has been no significant change in economic position. Authorized Participants should consult their own tax advisor with respect to whether wash sales rules apply and when a loss might be deductible.

A Fund may pay the redemption price for Creation Units at least partially with cash, rather than the delivery of a basket of securities. A Fund may be required to sell portfolio securities in order to obtain the cash needed to distribute redemption proceeds. This may cause a Fund to recognize investment income and/or capital gains or losses that it might not have recognized if it had completely satisfied the redemption in-kind. As a result, a Fund may be less tax efficient if it includes such a cash payment than if the in-kind redemption process was used.

## **Foreign Taxes**

To the extent that a Fund invests in foreign securities, it may be subject to foreign withholding taxes with respect to dividends or interest the Fund receives from sources in foreign countries. Tax conventions between certain countries and the United States may reduce or eliminate these taxes. If more than 50% of the total assets of a Fund at the end of a Fund’s taxable year consists of foreign securities, the Fund will be eligible to elect to treat some of those taxes as a distribution to shareholders, which would allow shareholders to offset some of their U.S. federal income tax. A Fund (or your broker) will notify you if it makes such an election and provide you with the information necessary to reflect foreign taxes paid on your income tax return.

## **Net Investment Income Tax**

U.S. individuals with income exceeding \$200,000 (\$250,000 if married and filing jointly) are subject to a 3.8% tax on all or a portion of their “net investment income,” which includes interest, dividends, and certain capital gains (including certain capital gain distributions and capital gains realized on the sale of shares of a Fund). This 3.8% tax also applies to all or a portion of the undistributed net investment income of certain shareholders that are estates and trusts.

## **Non-U.S. Investors**

If you are a nonresident alien individual or a foreign corporation, partnership, trust or estate, (i) a Fund’s ordinary income dividends distributed to you will generally be subject to a 30% U.S. withholding tax, unless a lower treaty rate applies but (ii) gains from the sale or other disposition of your shares of the Fund generally are not subject to U.S. taxation, unless you are a nonresident alien individual who is physically present in the U.S. for 183 days or more per

year. A Fund may, under certain circumstances, report all or a portion of a dividend as an “interest-related dividend” or a “short-term capital gain dividend,” which would generally be exempt from this 30% U.S. withholding tax, provided certain other requirements are met. Foreign shareholders who fail to provide an applicable IRS form may be subject to backup withholding on certain payments from the Fund. Backup withholding will not be applied to payments that are subject to the 30% (or lower applicable treaty rate) withholding tax described in this paragraph. Different tax consequences may result if you are a foreign shareholder engaged in a trade or business within the United States or if you are a foreign shareholder entitled to claim the benefits of a tax treaty.

## **Backup Withholding**

A Fund (or financial intermediaries, such as brokers, through which shareholders own shares) generally is required to withhold and to remit to the U.S. Treasury a percentage of the taxable distributions and the sale or redemption proceeds paid to any shareholder who fails to properly furnish a correct taxpayer identification number, who has under-reported dividend or interest income, or who fails to certify that the shareholder is not subject to such withholding.

The foregoing discussion summarizes some of the consequences under current U.S. federal income tax law of an investment in a Fund. It is not a substitute for personal tax advice. You also may be subject to state and local tax on Fund distributions and sales of Shares. Consult your personal tax advisor about the potential tax consequences of an investment in a Fund under all applicable tax laws.

**More information about taxes is included in the SAI.**

## **Additional Information**

---

### **Continuous Offering**

The method by which Creation Units are purchased and traded may raise certain issues under applicable securities laws. Because new Creation Units are issued and sold by a Fund on an ongoing basis, at any point a “distribution,” as such term is used in the Securities Act of 1933 (the “Securities Act”), may occur. Broker-dealers and other persons are cautioned that some activities on their part may, depending on the circumstances, result in their being deemed participants in a distribution in a manner which could render them statutory underwriters and subject them to the Prospectus delivery and liability provisions of the Securities Act.

For example, a broker-dealer firm or its client may be deemed a statutory underwriter if it takes Creation Units after placing an order with a Fund’s distributor,

breaks them down into individual shares, and sells such shares directly to customers, or if it chooses to couple the creation of a supply of new shares with an active selling effort involving solicitation of secondary market demand for shares of a Fund. A determination of whether one is an underwriter for purposes of the Securities Act must take into account all the facts and circumstances pertaining to the activities of the broker-dealer or its client in the particular case, and the examples mentioned above should not be considered a complete description of all the activities that could lead to categorization as an underwriter.

Broker-dealer firms should also note that dealers who are not “underwriters” but are effecting transactions in shares of a Fund, whether or not participating in the distribution of such shares, are generally required to deliver a prospectus. This is because the prospectus delivery exemption in Section 4(a)(3) of the Securities Act is not available with respect to such transactions as a result of Section 24(d) of the 1940 Act. As a result, broker dealer-firms should note that dealers who are not underwriters but are participating in a distribution (as contrasted with ordinary secondary market transactions) and thus dealing with shares of a Fund that are part of an “unsold allotment” within the meaning of Section 4(a)(3)(C) of the Securities Act would be unable to take advantage of the prospectus delivery exemption provided by Section 4(a)(3) of the Securities Act. Firms that incur a prospectus delivery obligation with respect to shares of a Fund are reminded that under Rule 153 under the Securities Act, a prospectus delivery obligation under Section 5(b)(2) of the Securities Act owed to an exchange member in connection with a sale on the Exchange is satisfied by the fact that the Fund’s Prospectus is available on the SEC’s electronic filing system. The prospectus delivery mechanism provided in Rule 153 is only available with respect to transactions on an exchange.

## **Premium/Discount Information**

Information regarding how often the shares of a Fund traded on the Exchange at a price above (i.e., at a premium) or below (i.e., at a discount) the NAV of the Fund for various time periods can be found at [www.strategasetfs.com](http://www.strategasetfs.com).

## **Contractual Arrangements**

The Trust enters into contractual arrangements with various parties, including, among others, the Funds’ investment adviser, sub-adviser, custodian, transfer agent, accountants, administrator and distributor, who provide services to the Funds. Shareholders are not parties to, or intended (or “third-party”) beneficiaries of, any of those contractual arrangements, and those contractual arrangements are not intended to create in any individual shareholder or group of shareholders any right to enforce the terms of the contractual arrangements against the service

providers or to seek any remedy under the contractual arrangements against the service providers, either directly or on behalf of the Trust.

This prospectus and the SAI provide information concerning the Trust and the Funds that you should consider in determining whether to purchase shares of a Fund. A Fund may make changes to this information from time to time. Neither this prospectus, the SAI or any document filed as an exhibit to the Trust's registration statement, is intended to, nor does it, give rise to an agreement or contract between the Trust or the Funds and any shareholder, or give rise to any contract or other rights in any individual shareholder, group of shareholders or other person other than any rights conferred explicitly by federal or state securities laws that may not be waived.

## **Financial Highlights**

---

The tables that follow present performance information about the Funds. This information is intended to help you understand each Fund's financial performance for the period of the Fund's operations. Certain information contained in the tables reflects the financial results for a single Fund share. The total returns in the tables represent the rate that an investor would have earned (or lost) on an investment in a Fund (assuming reinvestment of all dividends and distributions). The information provided below has been audited by Ernst & Young LLP, independent registered public accounting firm of the Funds. The financial statements and the unqualified opinion of Ernst & Young LLP are included in the Funds' Form N-CSR filing for the fiscal year ended December 31, 2024, and are available upon request by calling the Funds at 855-457-3637.

# Privacy Notice

***This information is not part of the prospectus.***

The Funds recognize and respect the privacy concerns of their customers. The Funds collect nonpublic personal information about you in the course of doing business with shareholders and investors. "Nonpublic personal information" is personally identifiable financial information about you. For example, it includes information regarding your social security number, account balance, bank account information and purchase and redemption history.

## **The Funds collect this information from the following sources:**

- Information we receive from you on applications or other forms;
- Information about your transactions with us and our service providers, or others;
- Information we receive from consumer reporting agencies (including credit bureaus).

## **What information the Funds disclose and to whom the Funds disclose information.**

The Funds only disclose nonpublic personal information the Funds collect about shareholders as permitted by law. For example, the Funds may disclose nonpublic personal information about shareholders:

- To government entities, in response to subpoenas or to comply with laws or regulations.
- When you, the customer, direct the Funds to do so or consent to the disclosure.
- To companies that perform necessary services for the Funds, such as shareholder servicing centers that the Funds use to process your transactions or maintain your account.
- To protect against fraud, or to collect unpaid debts.

## **Information about former customers.**

If you decide to close your account(s) or become an inactive customer, we will adhere to the privacy policies and practices described in this notice.

## **How the Funds safeguard information.**

The Funds conduct their business affairs through trustees, officers and third parties that provide services pursuant to agreements with the Funds (for example, the service providers described above). We restrict access to your personal and account information to those persons who need to know that information in order to provide services to you. The Funds or their service providers maintain physical, electronic and procedural safeguards that comply with federal standards to guard your nonpublic personal information.

## **Customers of other financial institutions.**

In the event that you hold shares of the Funds through a financial intermediary, including, but not limited to, a broker-dealer, bank or trust company, the privacy policy of your financial intermediary will govern how your non-public personal information will be shared with non-affiliated third parties by that entity.

More information about the Funds is available, without charge, through the following:

**Statement of Additional Information ("SAI"):** The SAI, dated May 1, 2025, as it may be amended from time to time, includes detailed information about the Funds and The Advisors' Inner Circle Fund III. The SAI is on file with the U.S. Securities and Exchange Commission (the "SEC") and is incorporated by reference into this prospectus. This means that the SAI, for legal purposes, is a part of this prospectus.

**Annual and Semi-Annual Reports:** Additional information about the Funds' investments is available in the Funds' annual and semi-annual reports to shareholders and in Form N-CSR filed with the SEC. In the Funds' annual reports, you will find a discussion of the market conditions and investment strategies that significantly affected each Fund's performance during its last fiscal year. In Form N-CSR, you will find the Funds' annual and semi-annual financial statements.

**To Obtain an SAI, Annual or Semi-Annual Report, Fund Financial Statements, or More Information:**
